

## FICHA TÉCNICA DE LA ASIGNATURA

Datos de la asignatura	
Subject name	Statistics and Probability
Subject code	E000008135
Main program	<a href="#">Grado en Análisis de Negocios/Business Analytics</a>
Involved programs	Grado en Análisis de Negocios/Business Analytics y Grado en Relaciones Internacionales [Segundo Curso] Grado en Análisis de Negocios/Business Analytics y Grado en Derecho [Tercer Curso] Grado en Administración y Dirección de Empresas y Grado en Análisis de Negocios/Business Analytics [Segundo Curso]
Level	Reglada Grado Europeo
Quarter	Semestral
Credits	6,0 ECTS
Type	Obligatoria (Grado)
Department	Departamento de Métodos Cuantitativos
Coordinator	Jose Luis Arroyo Barrigüete
Schedule	You will be in touch in the first days of school
Office hours	Pre-application
Course overview	The first part of the subject is dedicated to reviewing the concepts and techniques that allow to describe and summarize a dataset from a single-variant and bivariate point of view. Some of the topics covered are: frequency tables, charts, central trend measures, dispersion, position, concentration, contingency tables and measures of association and correlation, among others. The second part discusses the basic concepts about probability and modelling of random phenomena. Thus, they address among other aspects, the different conceptions of probability, the rectification of probability through the Bayes theorem, discrete and continuous random variables, and some frequently used probability models, such as Binomial law, Poisson's or Normal Law, among others.

Datos del profesorado	
<b>Teacher</b>	
Name	Antonio Rúa Vieites
Department	Departamento de Métodos Cuantitativos

## DATOS ESPECÍFICOS DE LA ASIGNATURA

### Contextualización de la asignatura

#### Aportación al perfil profesional de la titulación

Subject of an instrumental nature dedicated mainly to statistical techniques that allow to describe and summarize a data set from a single-variant and bivariate point of view. It develops topics necessary to address the information available, in such a way as to achieve a better understanding and knowledge of the behavior of the random and deterministic phenomena present in the making of business decisions in the different areas of the company (economy, finance, marketing, Human Resources), in which knowledge of reality and decisions on issues covered in them are characterized by the existence of uncertainty.

#### Prerequisitos

The use of previously studied mathematical concepts is required.

### Competencias - Objetivos

#### Competencias

##### GENERALES

<b>CG02</b>	Capacidad de análisis de datos masivos procedentes de diversas fuentes: texto, audio, numérica e imagen	
	<b>RA1</b>	Conocer las diferentes fuentes de datos tanto estructurados como no estructurados, internos o externos a la empresa, provenientes de fuentes digitales o no relevantes para el análisis y la gestión empresarial ¿basada en datos"(data driven)
	<b>RA2</b>	Conocer alguno de los procedimientos para integrar información procedente de diferentes fuentes de datos y de datos de diferente categoría (estructurados (datos numéricos) y no estructurados (texto, conversaciones, audio y video, datos de geolocalización, información de sensores¿).

<b>CG03</b>	Resolución de problemas y toma de decisiones en un entorno de datos masivos tanto cuantitativos como cualitativos	
	<b>RA1</b>	Saber seleccionar para cada problema la técnica o técnicas de análisis de datos más adecuada para poder convertir los datos ¿en bruto¿ en información y ésta en conocimiento que ayude a la toma de decisiones y a mejorar la gestión.
<b>CG04</b>	Capacidad para elaborar proyectos e informes de manera oral y escrita, difundiendo estas ideas a través de canales digitales	
	<b>RA1</b>	Ser capaz de resumir, sintetizar y comunicar de una forma atractiva y eficaz los resultados de la aplicación de las técnicas de análisis de datos, incluso de las más sofisticadas, de manera que resulten comprensibles a destinatarios no técnicos y ayuden de forma eficiente a la toma de decisiones empresariales.
<b>CG09</b>	Compromiso ético en la sociedad de la información	
	<b>RA1</b>	Persigue la excelencia en las actuaciones profesionales
	<b>RA2</b>	Se preocupa por las consecuencias que su actividad y su conducta pueden tener para los demás
	<b>RA3</b>	Incorpora en su discurso y en sus propuestas de actuaciones, las consecuencias que las mismas pueden tener para los distintos stakeholders de una organización global
<b>ESPECÍFICAS</b>		
<b>CE19</b>	Conocer los fundamentos de las principales técnicas tanto de la estadística clásica (descriptiva e inferencial) como del data mining	
	<b>RA1</b>	Conocer los fundamentos de las principales medidas y técnicas para describir un conjunto de datos desde un punto de vista univariante y bivariante.
<b>CE20</b>	Saber modelizar un problema empresarial real que precise análisis de datos y seleccionar críticamente la técnica o combinación de técnicas más adecuada	
<b>CE21</b>	Saber interpretar, evaluar y comunicar resultados derivados de las técnicas de análisis de datos así como usarlos para la ayuda en la gestión y la toma de decisiones empresariales	
<b>CE22</b>	Saber aplicar las técnicas de análisis de datos (tanto las de la estadística clásica como las técnicas de data mining) a un conjunto de datos reales, mediante el empleo de algún software apropiado para tal fin	
	<b>RA1</b>	Saber realizar un análisis descriptivo básico a un conjunto de datos reales usando software apropiado para tal fin

## BLOQUES TEMÁTICOS Y CONTENIDOS

### Contenidos – Bloques Temáticos

#### INTRODUCCIÓN

## TEMA 1: BIG DATA

- Era BIG DATA

## ESTADISTICA DESCRIPTIVA

### TOPIC 2: INTRODUCTION TO CLASSIC STATISTICS

- Key Definitions

### TOPIC 3: DESCRIPTIVE ANALYSIS

- Observation units: Variables and Data
- Presentation of the data: Frequency distributions and Graphical Representations.
- Relations between two variables: Scatter Charts and Contingency Tables

### TOPIC 4: MEASURES: STATISTICS

- Measures of Central Tendency: Mean, Median and Mode
- Position Measures: Quartiles, Deciles and Percentiles
- Variability Measures: Range, Variance, Standard Deviation, Variation Coefficient
- Standardization
- Measures of Form and Concentration: Gini and Lorenz Curve Index
- Relationship between two variables: Dependency / Independence Analysis, Correlation

### TOPIC 5: INDEX NUMBERS

- Simple and Compound Indices
- Indices of LASPEYRES, PAASCHE and FISHER
- Properties of index numbers
- Change of base
- Deflation

## TEORÍA DE LA PROBABILIDAD

### TOPIC 6: UNCERTAINTY AND ITS MEASUREMENT

- Random Phenomena: Concepts
- Operations with Events

- Probability: different conceptions
- Probability Rules
- Rectification of Probability: Bayes Theorem

**TOPIC 7 AND 8: RANDOM VARIABLE**

- Random Variable Concept
- Discrete Random Variables: Quantum Function and Distribution Function
- Continuous Random Variables: Density Function and Distribution Function
- Hope, Variance and Typical Deviation: Properties
- Probability Distribution Models:
  - Discreet: Binomial, Poisson, .....
  - Continuous: Uniform, Normal, .....

## METODOLOGÍA DOCENTE

### Aspectos metodológicos generales de la asignatura

#### Metodología Presencial: Actividades

<ul style="list-style-type: none"> <li>- Lessons of an expository nature.</li> <li>- Exercises and problem solving</li> <li>- Sessions dedicated to the management of the R Estudio and R Comander computer programs and their subsequent use for the resolution of business problems</li> </ul>	CG02, CG03, CG04, CE19, CE20, CE21, CE22
--	--

#### Metodología No presencial: Actividades

<ul style="list-style-type: none"> <li>- Individual and / or group study, and organized reading.</li> <li>- Troubleshooting both using computer programs and not.</li> </ul>	CG02, CG03, CG04, CE20, CE22
--	------------------------------

## RESUMEN HORAS DE TRABAJO DEL ALUMNO

CLASSROOM HOURS

Lecciones de Carácter expositivo	Ejercicios y resolución de casos y de problemas
35.00	25.00
<b>NON-PRESENTIAL HOURS</b>	
Ejercicios y resolución de casos y de problemas	Estudios individual y/o en grupo, y lectura organizada
50.00	60.00
<b>ECTS CREDITS: 6,0 (170,00 hours)</b>	

## EVALUACIÓN Y CRITERIOS DE CALIFICACIÓN

Evaluation activities	Evaluation criteria	Weight
<p>A final exam of the subject will be carried out, the content of which corresponds to the entire program.</p>	<ul style="list-style-type: none"><li>- Understand the fundamentals of the main techniques of descriptive statistics and probability theory by applying them to problem solving and decision making in a massive data environment.</li><li>- Knows how to apply the techniques of descriptive statistics to a set of real data by using the appropriate software for this purpose.</li><li>- Interpret, evaluate and logically communicate the results obtained from the application of statistical techniques in data analysis.</li></ul>	55
<p>CONTINUOUS ASSESSMENT</p> <p>Continuous evaluation tests, type test, will be carried out throughout the semester. These tests will be based on case studies using real databases.</p>	<ul style="list-style-type: none"><li>- Knows how to apply statistical techniques to a set of real data by using the appropriate software for this purpose.</li><li>- Interpreta evaluates and logically communicates the results obtained from the application of statistical techniques in data analysis.</li></ul>	25
<p>CONTINUOUS ASSESSMENT</p> <p>There will be several development tests based on case studies with databases throughout the semester.</p>	<ul style="list-style-type: none"><li>- Understands the fundamentals of the main techniques of descriptive statistics and probability theory by applying them to problem solving and decision making in a massive data environment.</li><li>- Interpret, evaluate and logically communicate the results obtained from the application of statistical techniques to data analysis.</li></ul>	20

## Calificaciones

FINAL SCORE

### CONVOCATORIA ORDINARIA

FINAL EXAM: 55%

WRITTEN TESTS: 20% of the average of the two tests

-Test 1: on topics 1, 2, 3, and 4

-Test 2: on topics 5, 6 and 7

TEST TYPE TESTS PERFORMED IN MOODLE: 25% of the average. Of the first 5 tests, the worst score is eliminated. Of the last 2, they are counted without being able to be compensated.

FINAL CONSIDERATIONS:

To carry out the weighted average between the final grade and the tests, it is necessary to have achieved at least score 4,5 on the Final Exam.

In the final qualification, assistance and active participation will also be taken into account in the continuous evaluation.

### CONVOCATORIA EXTRAORDINARIA

It will be considered the best of the following two options:

1. Use the same criteria as in the ordinary call.
2. Only consider 100% of the extraordinary exam exam grade.

REPEATER STUDENTS OF THE SUBJECT:

Student who repeats the course and has the pending subject: the final grade will be obtained following the above criteria.

Student who passes the course and has the pending subject: the final grade will correspond to that of the written exam.

## PLAN DE TRABAJO Y CRONOGRAMA

Activities	Date of realization	Delivery date
1st Test Type Test: Topics 1 and 2	2nd week of the course	2nd week of the course
2nd Test Type Test: topic 3	3rd week of the course	3rd week of the course
3rd Test Type Test: topics 3 and 4	5th week of the course	5th week of the course

4th Test Type Test: topic 4	6th week of the course	6th week of the course
1st Written Test: topics and "R": topics 1, 2, 3 y 4	7th week of the course	7th week of the course
5th Test Type Test: topic 5	8th week of the course	8th week of the course
2nd Written Test: topics 5, 6 y 7	11th week of the course	11th week of the course
6th Test Type Test: topic 8	12th week of the course	12th week of the course
7th Test Type Test: topic 8	14th week of the course	14th week of the course
2nd Written Test: topics and "R": topics 5, 6 and 7	14th week of the course	14th week of the course
