Ratings

To pass the total of the subject it is necessary to pass each one of the works and tasks assigned during the course plus the final test (exam).

Absence or non-participation, without just cause, will result in a 0 in the evaluation of that instrument.

- The projects and/or individual works will be recoverable (and essential to be able to take the extraordinary exam in July).
- Work group is not resit.
- The exam will not be resit, which will mean its repetition during the extraordinary call for the month of July.

IMPORTANT: The subject trains students in their specificities, also having as an objective the practice and improvement of the language. Both the most advanced aspects of morphology and syntax, as well as those of semantics, will be worked on, adapting the language to the different formats: written or audiovisual. Likewise, in the communicative function, the lexicon is given special attention as the basis for the enrichment of the language and its application to the different genres and texts, and the rules of the RAE and style books are followed. Spelling mistakes made by students in the different evaluation activities will be penalized.

It is essential that students learn to express themselves correctly and fluently orally or in writing, adapting to different registers, which includes the ability to write clear and well-structured texts, to analyze different types of speech and to write detailed expositions of topics complex.

For these reasons, at least 10% of the final mark will be allocated to the evaluation of correct oral and written expression in the co-official languages, knowledge required in the degree as general competence and transversal competence. At this point spelling and grammar will be tested.

Both in the ordinary and in the extraordinary call, the same criteria will be applied in terms of spelling correction and oral expression.
