FICHA TÉCNICA DE LA ASIGNATURA

Datos de la asignatura	
Subject name	Fintech & Financial Market Innovation
Subject code	E000014037
Main program	Bachelor's Degree in Business Analytics
Involved programs	Grado en Análisis de Negocios/Bachelor in Business Analytics [Third year]
Credits	3,0 ECTS
Type	Obligatoria (Grado)
Department	Departamento de Gestión Financiera

Datos del profesorado	
Teacher	
Name	Daniel Fernández Domínguez
Department	Departamento de Gestión Financiera
E-Mail	dfdominguez@icade.comillas.edu

DATOS ESPECÍFICOS DE LA ASIGNATURA

Contextualización de la asignatura
Aportación al perfil profesional de la titulación
Fintech & Financial Market Innovation contributes to the professional profile of the <i>Bachelor's Degree in Business Analytics</i> by providing students with a solid understanding of how technological innovation is transforming financial markets, financial services and investment processes. The course equips students with the conceptual and analytical foundations required to interpret, evaluate and anticipate the impact of digital technologies on the financial industry. This subject enables students to understand the structure and functioning of modern financial markets in a context characterized by digital transformation, platform-based business models and data-driven decision-making. Special emphasis is placed on the role of FinTech solutions, blockchain and tokenization, new trading technologies, digital payment systems and emerging forms of financial intermediation, allowing students to connect technological developments with changes in market efficiency, risk management and investment behavior. Overall, this course enhances the employability of Business Analytics graduates by preparing them to operate in technologically advanced financial environments, collaborate with multidisciplinary teams, and contribute to innovation processes in financial institutions, FinTech firms, consulting companies and data-driven financial roles.
Prerrequisitos
There are no formal prerequisites for enrolling in this course. However, it is recommended that students have previously acquired basic knowledge of financial markets, corporate finance and quantitative methods, as well as an introductory understanding of data analysis and statistical tools applied to business and finance.

Competencias - Objetivos

Competencias

Resultados de Aprendizaje

CN3	Resultados del proceso de Formación y de Aprendizaje. CN3. Conoce las herramientas y técnicas analíticas avanzadas usadas por las empresas en el análisis, simulación y predicción de datos económico-financieros.
HA3	Resultados del proceso de Formación y de Aprendizaje. HA3. Aplica modelos de valoración financiera utilizando datos masivos procedentes de las empresas o del mercado financiero
CM3	Resultados del proceso de Formación y de Aprendizaje. Identifica y resuelve problemas empresariales, tomando decisiones sobre variables financieras.
RA 1	Contabilidad Financiera y Análisis de Datos/Financial Accounting and Data Analytics (6 ECTS). RA 1: Saber analizar los estados financieros para comprender la realidad empresarial mediante el uso de la normativa contable y de los instrumentos que derivan de las técnicas de Business Analytics.
RA 1	Finanzas Corporativas Aplicadas/Applied Corporate Finance (3 ECTS). RA 1: Conoce los métodos de valoración de empresas empleados en la actualidad y estima las variables financieras necesarias para su aplicación práctica.
RA1	Contabilidad Directiva/Managerial Accounting (6 ECTS). RA1: Saber diseñar y analizar una estructura analítica de costes y de planificación adaptada a las necesidades de cada empresa para una adecuada toma de decisiones de gestión.
RA 1	Finanzas Cuantitativas/Quantitative Finance (3 ECTS). RA 1: Identificar los modelos financieros básicos y las técnicas cuantitativas empleadas por las empresas, para aplicarlas en la optimización de decisiones de inversión en activos financieros.
RA 1	Tecnología e Innovación en los Mercados Financieros/Fintech & Financial Market Innovation (3 ECTS). RA 1- Conoce y comprende los mercados financieros y su funcionamiento.
RA 2	Tecnología e Innovación en los Mercados Financieros/Fintech & Financial Market Innovation (3 ECTS). RA 2- Sabe aplicar herramientas cualitativas y cuantitativas, utilizando el software específico, al análisis de diversos escenarios en los mercados financieros.
RA1	Analítica de Datos Aplicada a las Finanzas/Applying Data Analytics in Finance (3 ECTS). RA1: Aplicar las técnicas de Business Analytics en el contexto financiero de las empresas como apoyo a la toma de decisiones.
RA2	Analítica de Datos Aplicada a las Finanzas/Applying Data Analytics in Finance (3 ECTS). RA2: Identificar los elementos financieros clave que permiten aplicar en cada situación la técnica de análisis de datos adecuada que contribuyan a crear valor en la empresa.
RA1	Derivados Financieros/Financial Derivatives (3 ECTS) RA1: Conocer los principales métodos de valoración de opciones, futuros y forwards, así como su uso como instrumento para la cobertura de riesgos
RA1:	Simulación Financiera/Finance Simulation (3 ECTS). RA1: Conocer los métodos de simulación financiera más utilizados en la práctica y saber aplicarlos en los distintos escenarios del negocio.

RA1	Analítica en la Valoración de Empresas/Analytics in Corporate Valuation (6 ECTS) RA1: Saber aplicar técnicas analíticas avanzadas a la valoración de empresas, a través de distintos métodos como: fundamentales, comparables y múltiplos.
RA1	Inteligencia Artificial en los Mercados de Capitales/Artificial Intelligence in Capital Markets (6 ECTS). RA1: Utilizando datos reales del mercado de capitales, el alumno conocerá los principales modelos factoriales para valorar activos financieros, así como las técnicas que permiten calibrar dichos métodos de valoración.
RA1	Inteligencia Artificial para Gestión de Activos/Artificial Intelligence in Asset Management (6 ECTS). RA1: Mediante técnicas de inteligencia artificial, el alumno aprenderá a optimizar carteras utilizando diferentes medidas de riesgo.
RA1	Mercado de Capitales y Trading Algorítmico/Capital Markets and Algorithmic Trading (6 ECTS). RA1: Saber diseñar algoritmos de trading, así como la implementación de estrategias de arbitraje.

BLOQUES TEMÁTICOS Y CONTENIDOS

Contenidos – Bloques Temáticos

Block 1. Disruption and Innovation in Financial Services

1. Digital transformation of the financial industry, emergence and definition of the FinTech ecosystem.
2. Main segments of activity (payments, alternative financing, investment management) and emerging business models.
3. Factors driving technological innovation and their impact on traditional intermediation

Block 2. Blockchain, Tokenization and stablecoins

1. Technical and conceptual fundamentals of blockchain, distributed ledger and smart contracts.
2. Tokenization of financial and non-financial assets and main use cases in banking, markets and insurance industry.
3. Typology and characteristics of cryptoassets (cryptocurrencies, stablecoins, tokens).

Block 3. Capital Markets and New Trading Technologies

1. Technological innovations in trading: dark pools, electronic trading and algorithmic trading.
2. Market Infrastructure: Custody, Exchange, Trading, Brokerage
3. Evolution of digital payment systems, wallets and open banking.

Block 4. Emerging Trends, Regulation and Ethical Challenges

1. Regulatory, supervisory aspects and ethical challenges associated with new technologies (e.g. Artificial Intelligence, robo-advisors, etc.)
2. New investor profiles, digital investment culture and socio-cultural changes.
3. Innovation opportunities, ethical challenges and sustainability considerations.

**METODOLOGÍA DOCENTE****Aspectos metodológicos generales de la asignatura****Teaching methods for the Financial Market course**

This course requires the students attend the class sessions. There are regular teaching sessions, case study discussions and practical problems and questions. Active student participation is important. They are expected to read the assigned materials prior to the class, in addition to preparing the problems and case studies when appropriate.

Teaching methods and activities when the student attends a class session**Competences**

Regular teaching sessions where the teacher will define and explain the technical terms and analysis, giving examples and pointing at the issues that arise debate in the reality of the financial markets. The student should listen attentively, trying to understand the rational and ideas being explained. He is expected to take notes of the main contents to complement class material. Classroom discussion is encouraged, and students can interrupt the professor asking questions or requesting further clarification. Preparation prior to the class is essential to take the most of the teaching session.

In addition to this, there are classes with a more active involvement from students. They will carry out activities and problems, supervised by the teacher, trying to apply in practice the theoretical content explained in class. During these workshops, problems are solved, case studies are discussed and news or reading material related to the topic are debated. Sometimes the work will be done individually, and sometimes the students will work as a team.

A few sessions may be spent in talks or presentations from guests who are professionals from different areas related to Financial Markets.

Cognitive skills**Interpersonal skills****Attitude skills****Teaching methods and activities outside the classroom sessions****Competences**

Besides taking part in class work and supervised workshops, the student needs to spend time revising individually the course material. Outside of the classroom, the student must read the materials assigned by the teachers, he also must work and solve problems and questions and look for additional information when needed.

Systemic skills**Practical and procedure skills****Instrumental skills**

Syllabus
2026 - 2027

Metodología Presencial: Actividades

- Master Classes
- General Content Presentation Sessions
- Public exhibition of topics or works
- Exercises and problem solving
- Organized debates
- Simulations
- Problem-Based Learning

Metodología No presencial: Actividades

- Monitoring of the financial markets on a day-to-day basis
- Directed work
- Study and documentation
- Theoretical or practical monographs
- Problem-Based Learning
- Case Study Resolution

RESUMEN HORAS DE TRABAJO DEL ALUMNO

CLASSROOM HOURS
NON-PRESENTIAL HOURS
ECTS CREDITS: 3,0 (0 hours)

EVALUACIÓN Y CRITERIOS DE CALIFICACIÓN

The use of AI to produce full assignments or substantial parts thereof, without proper citation of the source or tool used, or without explicit permission in the assignment instructions, will be considered plagiarism and therefore subject to the University's General Regulations.

Calificaciones

The final exam will have two parts: a theoretical part and a practical one. You must pass it with a score of, at least, 5.0 points to get the weighted grade and pass the course.

The students that have a formal exemption to attend class (including those who are studying abroad), the course grade will be 100% of the final exam grade.

In case a student fails, in the second or subsequent attempts, the grade will be 100% the final exam mark.
