

### Declaration of originality

I declare under my responsibility that the Project presented with the title “**Power play: strategic monetization of renewable energy assets in the Spanish data center market**” at the ICAI School of Engineering of the Comillas Pontifical University in the academic year **2025/2026** is of my authorship and has not been presented previously for other purposes. The Project is not plagiarized from any other, either totally or partially, and the information that has been taken from other documents is duly referenced.

### Use of Artificial Intelligence<sup>1</sup>

I declare under my responsibility that (indicate the correct option):

I have not used Artificial Intelligence in the preparation of this document.

I have used Artificial Intelligence in the preparation of this document and/or Annex B under the conditions allowed by Comillas Pontifical University, i.e. applying Level 2 of the Perkins et al. (2024) Assessment Scale: "AI can be used for pre-task activities such as brainstorming, description and initial research. This level focuses on the use of AI for planning, synthesizing and generating ideas, but assessments should emphasize the ability to develop and refine these ideas independently". Specifically, Artificial Intelligence has been used to:

- Identify preliminary references, which were subsequently cross-checked and validated.
- Improve the linguistic and stylistic quality of the text through language and style editing.
- Summarize and facilitate the understanding of complex literature.
- Provide review comments and suggestions aimed at improving and refining the work under different levels of scrutiny.

### Authorisation for Project delivery

Thesis supervisor

Signature: Dr. Antonio García y de Garmendia

Date: 22/06/2026

---

<sup>1</sup> This declaration refers to the use of generative Artificial Intelligence to carry out the Project documents (Annex B and Memory). It does not apply to Projects where, by their nature, artificial intelligence must be used as part of them (application of machine learning techniques, neural networks, data analysis...).
