EMail	jcmartin@icade.comillas.edu

SPECIFIC DATA OF THE SUBJECT

Contextualization of the subject

Contribution to the professional profile of the degree

This course allows students to achieve a deep knowledge of financial markets, their products and regulatory frameworks, which will allow them to improve their financial decision making (investments and financing).

Students will achieve a global vision of markets and products useful to specialise in finance through courses covering topics on specific financial products, or specific market trades, or on business valuation. This course is then on the basis of other MBA courses as it helps to understand the financial feasibility and dynamics of a business venture and it helps to better understand how business ventures can be financed or what type of investment they require.

Prerequisites

Basic knowledge of the global business environment at a macroeconomic level and at a microeconomic level (industries) and their basic interactions.

Basic knowledge of stock exchange markets and fixed income dynamics.

Basic/Intermediate knowledge of statistics.

Basic/Intermediate knowledge of data processing software (such as Excel)

Competencies - Objectives

Competences
