COURSE SYLLABUS

Course: **PSYCHOEDUCATIONAL PROCESSES**

COURSE DATA

Degree	Diploma in Humanities and Global Challenges
Academic Year	2023-24
Credits	6
Course type	Elective
Departament	Department of Education, Research and Assessment Methodologies
Language of instruction	English

SHORT DESCRIPTION

The subject Psychoeducational processes offers students the opportunity to reflect on the fundamental ingredients that contribute to the training of fully developed individuals. Likewise, it aims to assist in designing, planning, and developing positive and effective learning experiences in diverse contexts.

In order to teach and promote personal development (in any context), it is necessary to understand how people learn. Therefore, the processes underlying learning are analyzed, and emphasis is placed on both the personal and social elements, as well as the cultural aspects that shape what an individual becomes.

CONTENTS AND STRUCTURE

TOPIC 1: Learning and Teaching.
Foundations and Knowledge Acquisition. Constructivist Perspective.
Characteristics of Good Learning.
Analysis of Contexts and Promotion of Learning.

TOPIC 2: Psychoeducational Processes and their Implications in Learning.
Motivation and Emotion.
Perception, Attention, and Memory.
Thinking and Language. Metacognition.
Processes of Personal Identity Construction.

TOPIC 3: Practical applications of Psychology for learning contexts.
Learning to Learn. Learning Strategies.
Resilience in the Educational Context.

METHODOLOGY

Individual participation, work in pairs or small groups, and interaction within the classroom group are essential for the development of this course.

The methodology of the subject is predominantly active, aiming for students to always play a leading role. It relies on the dialogue and class debates led by the teacher and on the discussions triggered by their presentations, as well as on the questions proposed by the teacher. Therefore, it will be essential for students to engage in their own learning process, keeping a proactive attitude.

Throughout the course, students will individually or in teams carry out practical assignments, including the analysis of different learning situations and contexts (including non-formal and informal contexts, such as museums), role-playing, observations of reality, oral presentations, etc.

ASSESSMENT AND GRADING

Assessment type	Assessment criteria	Percentage
FINAL EXAM	Proof of having acquired the necessary skills to pass the subject.	40 %
GROUP /INDIVIDUAL ASSIGNMENTS	Participation and completion of the proposed activities during different sessions. Development and presentation of the group project.	40 %
PARTICIPATION	Active participation	20%

– Committing any serious academic misconduct, such as **plagiarism** of previously published material, or **copying** in the exam or any other graded activity, **will imply not being able to pass the course in the ordinary assessment period.**

– At the beginning of the term the professor will announce the office hours for the course. Tutorials are an essential part of the development of the course, and

students may attend tutorials during the course within those office times, but it is recommended that they are arranged in advance with the professor.

— Any non-face-to-face learning activity that requires the submission of an assignment/document, etc. will be submitted by the student through Moodle, always in PDF format.

— To be able to take the final exam, students must not have missed **more than one third of the classes without justification**. If this requirement is not met, the student may lose the right to be assessed both in the ordinary and extraordinary assessment period (art. 93-1 of the General Regulations). Failure to attend to the first hour of a two-hour lecture, means having missed the whole session in terms of attendance, regardless of whether or not the student the second hour.

STUDENT WORKLOAD (in hours)
