

FICHA TÉCNICA DE LA ASIGNATURA

Datos de la asignatura	
Subject name	Business Ethics and CSR
Subject code	DOI-MIT-682
Main program	Official Master's Degree in Telecommunications Engineering
Involved programs	Grado en Análisis de Negocios/Business Analytics y Máster Universitario en Ingeniería de Telecom. [Sixth year] Máster Universitario en Ingeniería de Telecomunicación + Máster Universitario en Big Data [Second year] Máster Universitario en Ingeniería de Telecomunicación [Second year] Máster Universitario en Ingeniería de Telecomunicación y Máster en Ciberseguridad [Second year] Máster Universitario en Ingeniería de Telecomunicación + Máster Big Data.Tecnología y Anal. Avanzada [Second year] Máster Universitario en Ingeniería de Telecomunicación + Máster in Smart Grids [Second year]
Level	Postgrado Oficial Master
Quarter	Semestral
Credits	3,0 ECTS
Type	Obligatoria
Department	Department of Industrial Organization
Coordinator	José Ángel Ceballos (Coord.)
Schedule	It will be determined at the beginning of the course.
Office hours	It will be determined at the beginning of the course.

Datos del profesorado

Teacher

Name	Braulio Pareja Cano
Department	Department of Industrial Organization
EMail	bpareja@icade.comillas.edu

Teacher

Name	Ignacio Babé Romero
Department	Department of Industrial Organization
EMail	ibabe@icai.comillas.edu

Teacher

Name	José Carlos Romero Mora
Department	Department of Industrial Organization
Office	Santa Cruz de Marcenado 26
EMail	Jose.Romero@iit.comillas.edu
Phone	2746

DATOS ESPECÍFICOS DE LA ASIGNATURA

Contextualización de la asignatura

Aportación al perfil profesional de la titulación

A feature that is increasingly common in some engineering courses – such as those taught at ICAI – is their generalist nature. And a clear reflection of this is the extraordinary range of professional activities that these engineers can access. It is not unusual to find engineers developing their professional career not only in industrial organisations, or in technological profile positions, but also in sectors of activity such as finance, auditing, business consultancy and, ultimately, any activity traditionally considered “management”. On the other hand, the number of engineers who direct their professional life towards the development of their own business project is also increasing.

From this perspective, far from being a profession closed in on itself, professional practice demands from these engineers the challenge of knowing how to contribute their effort and knowledge in contexts where they will inevitably and daily be faced with dilemmas and implications of an ethical nature in the professional field, which will not only affect them personally, but will also have consequences beyond their own lives.

In order to deal with these situations, mere ethical sensitivity is not enough, which sometimes translates into assessments that are the result of mere uncritical subjective intuitions. On the contrary, they must be able to perceive the ethical implications of the situations they face and the consequences that may follow from their decisions, in order to be able to assume them responsibly. And this from the perspective of the rational and well-founded justification of their ethical criteria and assessments.

For all these reasons, together with the specific technical training of their respective specialties, it is essential that the future engineer is trained to know how to address in a solvent and responsible manner the ethical implications of their activity.

Although this is a subject specifically oriented to the ethical aspects that arise in the professional practice of the engineer, among the general principles that this subject takes into account are the Sustainable Development Goals and that any professional activity must be carried out from respect for fundamental rights and equality before the law. In this sense, respect for and promotion of Human Rights and the principles of universal accessibility for people with disabilities are specifically promoted as a basic condition for a society based on coexistence and dialogue.

Prerrequisitos

None.

Competencias - Objetivos

Competencias

GENERALES

CB03	Saber evaluar y seleccionar la teoría científica adecuada y la metodología precisa de sus campos de estudio para formular juicios a partir de información incompleta o limitada incluyendo, cuando sea preciso y pertinente, una reflexión sobre la responsabilidad social o ética ligada a la solución que se proponga en cada caso
CB05	Saber transmitir de un modo claro y sin ambigüedades a un público especializado o no, resultados procedentes de la investigación científica y tecnológica o del ámbito de la innovación más avanzada, así como los fundamentos más relevantes sobre los que se sustentan

CG09	Capacidad para comprender la responsabilidad ética y la deontología profesional de la actividad de la profesión de Ingeniero de Telecomunicación
CG11	Capacidad para saber comunicar (de forma oral y escrita) las conclusiones- y los conocimientos y razones últimas que las sustentan- a públicos especializados y no especializados de un modo claro y sin ambigüedades
CG12	Poseer habilidades para el aprendizaje continuado, autodirigido y autónomo
ESPECÍFICAS	
CGT02	Capacidad para la elaboración, dirección, coordinación, y gestión técnica y económica de proyectos sobre: sistemas, redes, infraestructuras y servicios de telecomunicación, incluyendo la supervisión y coordinación de los proyectos parciales de su obra aneja; infraestructuras comunes de telecomunicación en edificios o núcleos residenciales, incluyendo los proyectos sobre hogar digital; infraestructuras de telecomunicación en transporte y medio ambiente; con sus correspondientes instalaciones de suministro de energía y evaluación de las emisiones electromagnéticas y compatibilidad electromagnética

Resultados de Aprendizaje

RA1	Identificar, analizar y proponer soluciones a los conflictos éticos que puedan suscitarse con motivo del ejercicio profesional.
RA2	Distinguir entre ética propiamente dicha y códigos corporativos u otros modelos de comportamiento más o menos formalizados.
RA3	Identificar los aspectos estructurales, organizativos y funcionales de una organización, que tienen una incidencia directa en la calidad ética de los comportamientos de los miembros de dicha organización.
RA4	Identificar distintos modelos de razonamiento moral y vincularlos a las diferentes teorías éticas.
RA5	Valorar una política de Responsabilidad Social, tanto desde la perspectiva de su fundamentación teórica, como de su desarrollo práctico.
RA6	Entender debidamente la relación entre la Sostenibilidad, de una parte con la Ética y la Responsabilidad Social, y de otra con la Economía, la Gestión de Empresas y los desarrollos tecnológicos.
RA7	Presentar y defender, tanto oralmente como por escrito, soluciones a conflictos éticos.

BLOQUES TEMÁTICOS Y CONTENIDOS

Contenidos – Bloques Temáticos

Block 1: Profession and Professional Ethics. Basic concepts.

Block 2: Moral reasoning and ethical theories.

Block 3: Ethical assessment and interest groups.

Block 4: Formalized models and codes.

Block 5: Professional responsibility and social responsibility.

Block 6: Growth and sustainability models.

METODOLOGÍA DOCENTE

Aspectos metodológicos generales de la asignatura

Metodología Presencial: Actividades

Lectures and general presentations.

Presentation of the main concepts and procedures through explanation by the teacher. It will include dynamic presentations, small practical examples and the regulated or spontaneous participation of the students.

CB03, CB05, CG09, CG11,
CG12, CGT02

In-class analysis of practical cases.

Analysis of real situations to place the student in context. The analysis will be carried out by the teacher and the students in a cooperative manner.

CB03, CB05, CG09, CG11,
CG12, CGT02

Metodología No presencial: Actividades

The main objective of the non-classroom work is to understand and comprehend the theoretical concepts of the subject, as well as to be able to put this knowledge into practice to solve different types of problems.

Study and analysis of practical cases to be solved outside of class time by the student. The student must use and internalize the knowledge provided in the subject. The correction in class may be carried out by one of the students or the teacher, depending on the case. The individual correction of each exercise may be carried out by the teacher, the student himself or another classmate, depending on the case (exchange method).

CB03, CB05, CG09, CG11,
CG12, CGT02

Individual practical work. Learning activities that will be carried out individually outside of class time, which will require some type of research or the reading of different texts.

CB03, CB05, CG09, CG11,
CG12, CGT02

RESUMEN HORAS DE TRABAJO DEL ALUMNO

CLASSROOM HOURS	
Clase magistral y presentaciones generales	Resolución en clase de problemas prácticos
30.00	15.00
NON-PRESENTIAL HOURS	
Estudio y resolución de problemas prácticos fuera del horario de clase por parte del alumno	Trabajos de carácter práctico individual
30.00	15.00
ECTS CREDITS: 3,0 (90,00 hours)	

EVALUACIÓN Y CRITERIOS DE CALIFICACIÓN

Evaluation activities	Evaluation criteria	Weight
Final exam of a theoretical and practical nature. It will be a single exam, and cannot be divided into different exams under any circumstances.	The following will be assessed: <ul style="list-style-type: none">• Understanding of concepts.• Application of concepts to the resolution of practical problems.• Analysis and interpretation of the results obtained in the resolution of problems.• Presentation and written communication.	40 %
Performance Evaluation <ul style="list-style-type: none">• Practical individual work• Group work• Active participation in class• Short exercises during class	The following will be taken into account: <ul style="list-style-type: none">• Understanding of concepts.• Application of concepts to the resolution of practical problems.• Analysis and interpretation of the results obtained in problem solving.	60 %

Calificaciones

The average grade for cases, reports and exercises of any kind will be taken only when the final exam is passed. Otherwise, the final grade for the subject will prevail as the grade corresponding to the exam.

No work or exercise in the "Continuous assessment" section may be exempt, in whole or in part, from the final exam.

Incurring in a serious academic offence, such as plagiarism of previously published materials or copying in your exam or other assessed activity, may lead to the opening of a disciplinary file and the loss of two calls.

The improper use of ChatGPT, or any other IAG, by students will be considered a serious offence, according to the General Regulations of the University, art. 168.2.e: "carrying out actions tending to falsify or defraud the academic performance assessment systems". The consequences of this may be "temporary expulsion for up to three months or the prohibition of taking the exam in the next session after the imposition of the sanction, in one or several subjects in which the student is enrolled, [...] apart from implying a failing grade (0) in the respective subject, [...] [and] the prohibition of taking the exam in that subject in the next session".

Failure to attend more than 15% of the sessions may imply the loss of the examination rights in the ordinary session. Failure to attend one of the hours of a double class will be counted as failure to attend the entire session, regardless of whether or not the other is attended.

Cases, assignments or reports submitted after the deadline will be considered as not submitted and will be graded as zero in the corresponding section.

Assignments, exercises or exams of any kind that are not completed will be graded, by default, as zero (except with prior authorization).

In the event of failing the subject in the ordinary session, the marks of the assignments, cases, reports or exercises provided for in this teaching guide and submitted in the ordinary session may be applied for the extraordinary grade. In such case, the student must only do the assignments, cases, reports or exercises that were failed or not submitted.

Unless otherwise expressly indicated, in all sessions, exams, assignments and exercises of any kind must have a grade of at least 5 out of 10 to pass.
