

COURSE GUIDE ACADEMIC YEAR 2023-24

COURSE INFORMATION SHEET

Course inform	nation		
Course title	Introduction to Economics		
Degree	Business Analytics		
Year	1 ⁰		
Semester	2º		
ECTS credits	6		
Hours/week	4		
Туре	Mandatory		
Department	Economic		
Sub-field	Economic Theory		
Coordinator	Juan Sentana		
Description Introduction to the economic science, covering important topics of interest in both Microeconomics and Macroeconomics, such as the supply and demand model market structures and profit maximization: perfect competition, monopoly oligopoly, the labor market, national accounts, unemployment.

DETAILED INFORMATION ABOUT THE COURSE

Context of the course Contribution to the professional profile of the degree

It provides students an introductory overview of modern economics, including examples in microeconomics that have a bearing on the world of business, i.e., the organization of firms, the economic implications of their objectives, and the markets in which they operate, and examples in macroeconomics, i.e. the global environment where firms operate.

SKILLS

Skille Objectives				
Skills – Objectives				
Generic skills of degree program				
Instrumental skills				
CGI 1. Analytical capacity and ability to synthesize				
CGI 2. Problem resolution and decision-making ability				
CGI 4. Ability to manage information from diverse sources CGI 7. Oral and written communication in a foreign language				
Interpersonal skills				
CGP 9. Interpersonal skills: listen, discuss and debate				
CGP 10. Leadership capacity and ability to work in group situations				
CGP 11. Critical capability				
CGP 13. Recognition of, and respect for, diversity and multiculturalism				
Systemic skills				
CGS 14. Capacity to learn and work independently				
CGS 17. Capacity to elaborate and transmit ideas, projects, reports, solutions and problems				
Learning outcomes (intellectual skills)				
Analytical capacity and ability to synthesize the basic functioning of a Market Economy.				
Describe and comprehend the Supply Theory.				
Describe, comprehend and work with a Demand Supply Model under perfect competition and under				
imperfect competition: monopoly and oligopoly. Understand the basics of the functioning of the labor market.				
Acquire the basic knowledge about the market efficiency and the market failure				
Learning outcomes (practical skills)				
An ability to use basic mathematical skills in the economic analysis of markets				
Use and interpret basic economic data.				
Development of oral presentational skills, and capacity to work in groups and to pursue independent study.				
Learning outcomes (attitudinal)				
Listen, argue and criticize the social and ethical implications of issues in international				
political economy				

TEACHING APPROACH AND STRATEGIES

much more out of the lecture if they do the recommended reading beforehand.

 General learning and teaching approach of the course

 The main teaching approach is based on the encouragement of active participation in class and group situations. The primary means of imparting knowledge and understanding is through the lecture but students are strongly encouraged to engage in independent reading for which they are given extensive support and guidance on reading materials and their appropriate use.

 Class-based teaching methods
 Skills

Lectures. The purpose of lectures is to introduce students to the main areas of the course and to provide the grounding for further study. Use will be made of this traditional teaching method as a way of presenting the greatest amount of information to a large number of students in a relatively efficient manner. However, it is expected that students will interrupt, make comments and ask questions throughout the lecture thus transforming it into an active learning process.	CE23 CGI1 CGP9 CGP11
Often the lecturer will provide some recommended reading to do before the lecture which will give the student an idea of the nature of the topic to be covered. Students find that they get	CGP13

• • • • • • • • • • • • • • • • • • •	
Case-study analysis. Use will be made of this student-centered, active learning strategy in	CE23
order to develop student skills and knowledge. Often the starting point for deeper	CGI1
investigation of the subject.	CGI2
	CGP9
	CGP10
	CGS17
Class discussions and resolution of exercises. Discussions constitute a primary teaching	CE23
method in order to stimulate critical thinking. Students have an opportunity to make significant	CGI1
contributions to the learning of others and develop their own analytical skills and articulate their	CGP9
ideas and opinions clearly. Discussion class where students study a subject in depth, solve	CGP11
exercises and exchange ideas. Often led by the students.	CGP13
	CGS14
Outside classroom activities	Skills
Independent study. Students are expected to undertake independent study which will	
concentrate on reading the textbook and researching in the library to carry out in-depth	CE23
investigations of areas of interest. There is only a limited amount of information that can be	CGI1
covered in class time, so students will be expected to study independently on a regular basis.	CGI4
As a general rule of thumb you should aim to do two hours of independent study for every hour	CGS14
you do in the classroom.	
Office Hours. An exploration of progress in the course with the lecturer, either one-to-	CGP11
one or in a small group. Resolution of learning problems and difficulties.	CGS14

ASSESSMENTS AND ASSESSMENT CRITERIA

Assessment activities

• Ordinary period:

Midterm Assessment: there will be several coursework tasks that will be carried out throughout the course, previously notified by the professors, to check the extent of knowledge acquired by students.

The final exam will represent 60% of the final grade, and you will need at least a 5 to pass.

The FINAL MARK will be given by:

(0.6 x Final Exam) + (0.4 x Midterm Assessment)

IMPORTANT: A FINAL MARK OF AT LEAST 5 IS NEEDED TO PASS THE COURSE.

• Extraordinary period:

Resists, will be taken if the student fails the course with an exam that covers all the topics. Course practical grades could be taken into account if those help the student. Weights will be 20% course work and 80% the final exam.

Students in exchange programs and with a leave of absence will be graded through the final exam that will count 100%.

Any 1st year ADE student repeating this course will have to come to class and follow the same course evaluation as any other ordinary student.

Thematic units and contents

Contents – Thematic units

Topic 1: Introduction to Economics

Topic 2: The Supply and Demand model

Topic 3: The Demand Theory: The Rational Consumer' Behavior

Topic 4: The Supply Theory: Behind the Supply Curve, Production and Costs

Topic 5: Perfect Competition

Topic 6: Monopoly

Topic 7: Competitive Markets

Topic 8: Introduction to Macroeconomics

SUMARY OF STUDENT WORKLOAD						
CONTACT HOURS						
Lectures	Activity based classes	Written tests				
36	24	5				
Independent study	Group exercise solving	Individual exercise solving				
40	15	30				
		ECTS CREDITS:	6
