SPECIFIC DATA OF THE SUBJECT

Contextualization of the subject
Contribution to the professional profile of the degree

Within the Marketing itinerary, and after having learned the fundamentals marketing and market research, this subject digs into one of the four areas of business planning:

Communications. This discipline allows the student to acquire the theoretical and practical knowledge needed to:

- Develop product and/or brand communications strategies
- Choose the proper media channels to evolve the communications plan
- Select the proper messages, complying with the legal framework in Spain
- Define the target audience for each communication strategy and measure the success of each strategy by selecting the proper objectives and KPIs

The student must be able to acquire a basic knowledge of the Advertising terminology, usage of Marketing tools and application of the legal principles to which a Comms. Plan can be subjected to.

The student must be able to develop, as part of a team, an effective communication plan for a given company. The team should distribute the work in an equitable manner, establish the

agency roles that may be necessary and present the communication plan in class as a group

Prerequisites

Having completed Introduction to Marketing and Market Research

Competencies - Objectives

Competences

GENERALES

CG1	Adquirir una base de conocimientos sólida y relevante sobre la disciplina científica y empresarial	
	RA1	Identifica, define y explora las problemáticas concretas del área de estudio de manera lógica y coherente dentro de un marco analítico adecuado.
CG2	Capacidad de gestionar información y datos provenientes de fuentes diversas para hacer un análisis crítico y un correcto diagnóstico de la realidad empresarial.	
	RA1	A partir de la información y datos obtenidos de fuentes diversas, identifica problemas empresariales determinando, el origen/las causas de los mismos
	RA2	Es capaz de realizar dicho proceso de diagnóstico dando y recibiendo feed-back de forma assertiva, que ayude a incrementar la integración y la confianza en los equipos de trabajo.
CG3	Capacidad para la resolución de problemas y toma de decisiones empresariales seleccionando y aplicando adecuadamente las técnicas pertinentes de análisis de datos	

	RA1	Identifica, captura y analiza de forma eficiente datos de fuentes primarias y secundarias que sean necesarios para el análisis del entorno competitivo de la empresa
	RA2	Aplica los conceptos matemáticos y técnicas cuantitativas y cualitativas de análisis de datos necesarios para la resolución de problemas empresariales y apoyar el diagnóstico y toma de decisiones en la empresa.
CG5	Desarrollar habilidades interpersonales que refuercen el aprendizaje de un trabajo autónomo, bien organizado y planificado y que esté orientado a la acción y a la calidad.	
	RA1	Desarrolla habilidades académicas, interpersonales e instrumentales necesarias para la investigación independiente, relacionando los conocimientos adquiridos con las distintas aplicaciones profesionales o prácticas reales.

ESPECÍFICAS DE OPTATIVIDAD

CEOPT2(GM)	Conocimiento de la aplicación de las distintas herramientas de comunicación empresarial y capacidad para elaborar un plan integral de comunicación, destacando la valoración de estrategias y tácticas de creación de mensajes y selección de medios.
	RA1 Ser capaz de realizar un plan integral de comunicación integrando las distintas herramientas de comunicación empresarial y con un mensaje adecuado y relevante.

THEMATIC BLOCKS AND CONTENTS

Contents - Thematic Blocks

Module 1 - IMC Introduction IMC Definition. From the 4Ps to the 7Ps on Marketing. Brand Image vs Corporate's Identity and Personality

Module 2 - Communication Plan design:

Part I Definition of the Customer Journey and the Personas which covers the target audience of a Comms. Plan. SWOT Analysis definition and understanding of the Moments that Matter or Truth Moments within the Comms. Plan

Module 11 - Digital Analytics: Part I Introduction to the digital measurement system. KPIs definition and digital basic metrics to optimize media investment. Introduction to tags and measurement scripts

Module 12 - Digital Analytics: Part II Google Analytics Individual Qualification (optional)

TEACHING METHODOLOGY

General methodological aspects of the subject

A combination of lectures and workshops (case studies) will be used.

Use of Artificial Intelligence (AI) – Level 3: Partial Assistance with Human Control In this topic the use of AI across the curriculum aligns with Level 3: Partial Assistance with Human Control according to the AI Assessment Scale by Perkins, Furze, Roe & MacVaugh (2024). The AI generates part of the content: Students may use AI tools to produce drafts, outlines, preliminary analyses, summaries, or examples. The student then reviews, adapts, improves, and integrates the AI-generated content with their own insights and research. The final result must be coherent and reflect each student's own understanding and judgement. The interaction is mainly one-directional: AI produces, the human curates and modifies. AI-generated content must not exceed the student's own contribution.

Where authors use generative artificial intelligence (AI) and AI-assisted technologies in the writing process, authors should only use these technologies to improve readability and language. Applying the technology should be done with human oversight and control, and authors should carefully review and edit the result, as AI can generate authoritative-sounding output that can be incorrect, incomplete or biased. Authorship implies responsibilities and tasks that can only be attributed to and performed by humans. Students should disclose in their reports the use of AI and AI-assisted technologies in the writing process by including a statement such as "During the preparation of this work the author(s) used [NAME TOOL / SERVICE] to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication". If students did not use AI, then the statement should read "AI was not used in this work".

In-class Methodology: Activities

Lectures	CG1, CG5, CEOPT2(GM)
Case studies and problem resolution	CG1, CG2, CG3, CG5, CEOPT2(GM)

Non-Presential Methodology: Activities

Study and exam preparation	CG1, CG5, CEOPT2(GM)
Project work and case study resolution	CG1, CG2, CG3, CG5, CEOPT2(GM)

SUMMARY STUDENT WORKING HOURS

CLASSROOM HOURS	
Lecciones de carácter expositivo	Ejercicios y resolución de casos y de problemas
30.00	30.00
NON-PRESENTIAL HOURS	
Estudio individual y/o en grupo y lectura organizada	Ejercicios y resolución de casos y de problemas
50.00	40.00
ECTS CREDITS: 6,0 (150,00 hours)	

EVALUATION AND CRITERIA

The use of AI to produce full assignments or substantial parts thereof, without proper citation of the source or tool used, or without explicit permission in the assignment instructions, will be considered plagiarism and therefore subject to the University's General Regulations.

Evaluation activities	Evaluation criteria	Weight
Exam	See guide to exam	50
Individual workshops	See Guide to assessment	10
Group Project	See Guide to assessment	35 %
Student engagement and quality participation in online/offline activities	See guide to assessment	5 %

Ratings

For ICADE-OUT students their assessment will be based on the final exam. Non-attendance to at least 75% of lessons may imply losing the first exam call (ordinaria).

Students that do not pass the course in the first call, they will have to resubmit the failed assessment. If they have failed the exam, they will have to resit it; if they have failed the course projects, they will have to do a special project.

For the third and subsequent calls, students will have to do an exam (50%) and a project (50%).

The improper use of ChatGPT or other generative artificial intelligence (GAI) will be considered a serious offense as stated in the General Regulations of the University, art. 168.2.e as: "carrying out actions aimed at falsifying or defrauding the evaluation systems of academic performance". The consequences of this will be "temporary expulsion for up to three months or the prohibition to take an exam in the following call to the imposition of the sanction, in one or more subjects in which the student is enrolled, [...] apart from the grade of failure (0) in the respective subject, [...] [and] the prohibition to take an exam in that subject in the following call". In this regard, the use of

ChatGPT or other IAG in the framework of the final project and exercises of the subject will be considered improper (and therefore prohibited), insofar as its use would seriously compromise the ability of these evaluation systems to assess the student's acquisition of the competences of the subject. In the cases where the use of AIG is allowed, the purpose and uses should be made clearly explicit and the prompts used should be provided in an appendix
