SPECIFIC DATA OF THE SUBJECT

Contextualization of the subject
Contribution to the professional profile of the degree
<p>Social media represents one of the most significant changes in consumer behaviour, leading to fundamental transformations in the way organizations communicate and interact with consumers. The necessary practical knowledge is provided in order to establish the most appropriate objectives and strategies, to correctly select the social media platforms that attract consumers, as well as to measure the results of these efforts.</p> <p>From a multidisciplinary perspective, we analyze how to use the tools and services necessary to obtain valuable information about how consumers feel and how they respond to a particular brand and those of competitors.</p> <p>More specifically: the social media marketing ecosystem and its impact on the traditional marketing strategy are described; the social media marketing process is analyzed; the different platforms and their uses are reviewed; and, finally, it is discussed how to integrate them in the marketing plan of the company to boost</p>

its notoriety and / or that of the brand.

This subject is one of those offered in the marketing itinerary and it is essential every time that the skills are acquired and the content is deepened that allow a brand to establish relationships with its potential consumers and maintain them, through digital media.

TEACHING METHODOLOGY

General methodological aspects of the subject

The course methodology is based on different class sessions covering multiple areas of the learning sequence. Throughout the class, students must solve problems, make presentations (individually and in groups) and discuss new trends and business cases.

The professor will provide relevant documentation, which students should read before each class. During the course, students will work on solving problems and discussing issues related to the established theory.

During the course, different professionals from the digital economy field will be invited to present projects and social media cases and the students' participation will be necessary for the resolution.

USE OF AI

This course permits the use of both non-generative AI tools, such as translators, social listening tools and platforms for identifying competitors and benchmark variables, and generative AI tools, including Elicit, GPT, Scholar AI and LMNotebook, to support the analysis of the general and specific environments, the understanding of markets and competitors, and the development of strategic and tactical actions in a social media plan. Responsible and critical use is encouraged.

According to the institutional AI Assessment Scale (Perkins et al., 2024), the course is classified as **Level 4 permission with special conditions**. This means that AI can be used to complete any part of the task and students must guide it to meet the assessment objectives. AI can be used extensively in task development, provided that:

- They critically evaluate and modify any AI-generated content; and
- they document their use of AI in detail.

Uncontrolled use is not permitted. Students must demonstrate critical thinking to ensure academic integrity and their own learning:

- For the use of non-generative AI, students must indicate which tools they used, in which parts of the work and, if applicable, the keywords used.
- For generative AI, they must specify the tools used, the prompts or instructions given, and the sections of the work to which those tools were applied.

In-class Methodology: Activities

Visitors' speeches	CG04, CE13
Case study	CG01, CG03, CG04, CE13
Presentations	CG01, CG04, CG05, CE13

Non-Presential Methodology: Activities
