SPECIFIC DATA OF THE SUBJECT**Contextualization of the subject****Contribution to the professional profile of the degree**

This course aims to develop self-awareness, perception, biases, and prejudices in order to build effective techniques for conflict management and negotiation in both personal and professional environments. The goal is for students to acquire the necessary skills to successfully face any negotiation.

The approach to the subject is primarily practical, where students will develop their abilities through business cases and role-plays, while also gaining an understanding of the principles explained in class.

Prerequisites

The inclusion of this subject in an MBA program assumes that the student is already familiar with various aspects of management and the different functional areas of a company. It is a valuable addition and offers an opportunity to put into practice concepts and knowledge from other subjects.

It is advisable to have curiosity about different business sectors in order to effectively engage with the roles presented in case studies.

Syllabus
2025 - 2026

Competencies - Objectives

Competences

GENERALES

CG02	Management of data and information as key elements for decision-making and for identification, formulation and resolution of business problems.
CG03	Problem-solving and decision-making skills at a strategic, tactic and operational level with regard to a business, considering the interrelationship between the different functional and business areas.
CG05	Ethical commitment with a behaviour based in moral principles and those principles of the organisation when facing moral dilemmas and corporate social responsibility issues.
CG06	Time management capacity with the purpose of improving personal and team efficiency within business organizations, its environment and its management.
CG07	Critical reasoning and argumentation according with the understanding of knowledge and know-how on business administrations, their external context and their administration and management processes.
CG08	Initiative, creativity and entrepreneurship when applying management techniques and related knowledge to management and development of business organizations.

THEMATIC BLOCKS AND CONTENTS

Contents - Thematic Blocks

WHAT IS CONFLICT? CONFLICT MANAGEMENT

- 1.1 Definition of conflict. When does a conflict arise?
- 1.2 Assertive communication and feedback
- 1.3 Conflict resolution method. Win-win strategy

TEACHING METHODOLOGY

General methodological aspects of the subject

Because the course is fundamentally in-person and practical, student attendance in the classroom is essential. Practical cases and role-plays will be carried out in teams, allowing for a feedback process among participants. After each activity, there will be a group discussion in class to reinforce learning and improve the outcome of future cases.

At the end of the semester, students will be able to assess their personal progress and improvement.

Use of AI:

Students are allowed to use AI and other digital tools in this class. Learning to use AI is an emerging skill that is essential for the future.

CIHS

Syllabus 2025 - 2026

Students may use AI to complete specific tasks in their coursework (Level 5: creative and integrated use according to the scale <https://aiassessmentscale.com/>). Any content created with AI must be properly cited. AI is a tool, and its use must be clearly indicated, including the purpose for which it was used.

Students must include a paragraph at the end of each assignment where AI was used, explaining how it was used and what prompts were given to obtain the results. Failure to do so constitutes a violation of the academic honesty policy.

Students are encouraged to verify the results obtained through these tools. If AI provides a piece of information, the student must assume it is incorrect unless they already know the answer or can verify it through another source. The student is responsible for any errors or omissions provided by the tool.

In-class Methodology: Activities

Simulations, Role Plays, Group Dynamics

Analysis and resolution of real negotiation cases in various business and personal settings. Based on the individual reading of the case proposed by the instructor, students synthesize the information and data they consider relevant for decision-making and problem-solving. These data are then shared within the working team, aiming to develop a strategy and approach to face the opposing team.

Students must plan which topics should or should not be addressed, be creative in generating ideas and proposals to be discussed, and decide who will lead the negotiation and how. During the preparation, the team must internalize and assume the role of the character, company, and situation in which the negotiation takes place, evaluating their joint performance and the contribution of each team member.

During the negotiation, students must manage communication, perception, and emotional situations. They are supervised either by the instructor or by a team of observers who will evaluate the development of the negotiation and provide feedback to the participants, both on their skills and their behavior (ethics), including how they handled the case.

After receiving feedback from the observer and reviewing the case, each student must conduct a self-critical analysis, identifying the aspects and areas for improvement and what could have been done better. This reflection is recorded in their negotiation journal, along with the feedback received.

Participatory Lecture Sessions

Based on the case and during the review phase, the instructor explains the basic concepts with the active and collaborative participation of the students, who discuss unclear points or nuances they consider relevant for a proper understanding of the content. These sessions will include dynamic presentations and both structured and spontaneous student participation through various activities.

Exercises

A series of practical exercises are carried out, each focusing on the development of a specific element of negotiation and its preparation. These are not full case studies, but rather exercises that simulate real-life situations and concentrate on a particular aspect of negotiation (interests, options, alternatives, legitimacy, communication, relationship, commitment).

By completing these exercises, students acquire tools and models that help solidify the concepts from a theoretical perspective. This is an individual task, which is then shared and discussed by the instructor with the entire class, while also reviewing the conceptual frameworks related to the exercise using audiovisual support.

Non-Presential Methodology: Activities

Study and Documentation

Individual study carried out by the student to understand, rework, and retain the structural framework of negotiation based on principles, which will be assessed from a theoretical perspective.

EVALUATION AND CRITERIA

The use of AI to produce full assignments or substantial parts thereof, without proper citation of the source or tool used, or without explicit permission in the assignment instructions, will be considered plagiarism and therefore subject to the University's General Regulations.

Evaluation activities	Evaluation criteria	Weight
Final exam	Comprehension and relational skills. A minimum score of 5 out of 10 is required to pass the course.	50 %
Individual study of a real negotiation case.	<ul style="list-style-type: none">• Application of theoretical knowledge to a real case• Evaluation of acquired skills	25 %
Resolution of practical cases in class or remotely. These cases may be individual or group-based.	<ul style="list-style-type: none">• Application of theoretical knowledge to a real case• Evaluation of acquired skills	25 %

Ratings

In order to pass the subject during the regular class period, the student must obtain a minimum grade of 5 in all defined evaluation components.

Students who do not pass this first evaluation will be allowed to retake the individual exam and/or the project/activities defined by the instructor during the June/July resit period.
