#### **DETAILED INFORMATION ABOUT THE COURSE**

#### Context of the course

#### Contribution to the professional profile of the degree

Buyer behavior is a broad field that studies how individuals, families and groups acquire, consume, and dispose of goods, services, ideas and experiences. This course, offered as optative in a Marketing Intensification, analyses those principles of consumer behavior that are useful to business managers, government regulators and nonprofit organizations and everyday people. For marketing managers, knowledge of consumer behavior has important implications for environmental analysis, product positioning, segmentation of the marketplace, and the design of the marketing mix. Consumption themes and meanings are also core aspects of contemporary life as major portions of our lives are spent anticipating, engaging in, and remembering purchase and consumption activities. Therefore is a basic course for those people willing to work in marketing

#### **TEACHING APPROACH AND STRATEGIES**

#### General learning and teaching approach of the course

The main teaching approach is based on the encouragement of active participation in class. The primary means of imparting knowledge and understanding is through the lecture but students are strongly encouraged to engage in problem solving and independent reading for which they are given extensive support and guidance on reading materials and their appropriate use. The creation of an emotional relationship between the student and the course is a second objective, with the intention that at the end of the course the student "think in consumption mode"

This course includes some elements of PBL(Project Based Learning), Experiential Learning, Flipped Classroom, Gamification an in general it is followed an intuitive approach (from the case to the common)

The course combines both individual and team work

### **Grading system**

#### **Ordinary Call**

The final grade will consist of three different parts according to the following distribution. Every student must obtain a minimum of "5" in each of them separately to be able to be graded in the course.

- 1. 50% of the final grade will correspond to the theoretical knowledge of all the course and will consist in a final exam on the scheduled dates set by the Dean's Office. This exam will be divided into two parts
  - a. A test (or similar) on basic knowledge of the subject (25%)
  - b. A reflection on the theory applied to the workshop assigned to each student. (25%) This reflection can be submitted in "draft mode" to the teaching staff at any time in the calendar. Teachers will issue an opinion and propose relevant improvements, thus issuing a provisional rating that may be improved the day of the exam.
- 2. 25% to the realization of a teamwork (3 people). Each team will be assigned a certain character, who lives in a concrete context and you will be asked to:
  - a. Investigate and analyze the environment in which he lives (secondary data)

- b. Justify a shopping cart for a week, consistent with the character and its surroundings
- c. Reflect on how the macro trends are reflected in brands purchased
- d. Subsequently, with the same character, students are asked to develop a process of a complex problem (high involvement) purchase
- 3. 25% participation in class activities, It includes the preparation and implementation of the assigned workshop

All assignments must be delivered in the intranet of the subject (moodlerooms), at the scheduled dates, No assignment will be accepted after the deadline or outside that platform (with exceptions arising from the format of the work which in any case will need the Teacher's agreement)

#### Resits

In the case of not getting the minimum grade of "5" in one or several of the above sections, in the ordinary call, the student will need to resit only the section or sections failed in accordance with the following plan

- 1. The student should make a critical essay of the book "Born to buy" of Juliet B. Schor (2006) Ed. PAIDOS IBERICA. It is expected a written work in which are reflected:
  - a. Overview: which chapters contains, and what the contents.(approx. 25%)
  - b. The main ideas of the work.: ideas or theses which constitute its main contribution (approx. 10%)
  - c. Other useful information (relationship to other works of the author, place occupied in his intellectual evolution) (approx. 15%)
  - d. Criticism. The position of the student front of the text. Is an agreement?, Which ideas do you agree most? Which does not?, Why? (approx. 50%)

Format: written. up to 5 A4

2. Perform a research and analysis according to the topics of the subject for a given consumer type. In this case for Seniors (people born before 1940). The day fixed for the examination is expected that students present an overview of these consumers and how the following variables (Perception, Learning, Motivation, Personality, Attitudes, Self-concept, Lifestyles, Family, Religion, Rites and myths (received and sent), *influencers*). Students should also come prepared to answer possible questions that teachers may ask about the contents of this work.

#### **Exchange Students**

Exchange Students (incoming students) who must return to his/her home University before the end of the semester must take out the examination in the last week that they are here. Other sections governed in the same way as for ordinary students.

Students in Exchange (out-going students), in the event that no recognition of this course, shall submit to a theoretical exam (100%). However and if they wish so, they may perform practical work, in a tutorial, which will take place at assigned slots, and with a weight in the final qualification (always less than 50%)
