## DETAILED INFORMATION

<table>
<thead>
<tr>
<th>Contextualization of the course</th>
<th>Contribution to the professional profile of the degree</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>This course will contribute to the professional profile of the student by enabling him/her to become knowledgeable about the major environmental impacts of electricity production and use; to be familiar with the methods used to quantify these environmental impacts; to understand and be able to compare the regulatory instruments available to control environmental impact in the power industry; and to learn the different renewable electricity production technologies. This knowledge will be very useful to work in power utilities, consulting companies, or to become a regulator in the power sector.</td>
</tr>

# CONTENTS

<table>
<thead>
<tr>
<th>Contents</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Chapter 1: Electricity and the environment</strong></td>
</tr>
<tr>
<td>1.1 Introduction.</td>
</tr>
<tr>
<td>1.2 Atmospheric pollution and other impacts.</td>
</tr>
<tr>
<td>1.3 Climate change.</td>
</tr>
<tr>
<td><strong>Chapter 2: Environmental impact assessment</strong></td>
</tr>
<tr>
<td>2.1 Environmental impact assessment.</td>
</tr>
<tr>
<td>2.2. Economic valuation of environmental impact</td>
</tr>
<tr>
<td><strong>Chapter 3: Instruments for environmental regulation</strong></td>
</tr>
<tr>
<td>3.1 Instruments for environmental regulation. The theory.</td>
</tr>
<tr>
<td>3.2 Environmental regulation in practice: second-best.</td>
</tr>
<tr>
<td>3.3 Climate change policies.</td>
</tr>
<tr>
<td>3.4 Technology policies</td>
</tr>
<tr>
<td>3.5 Energy efficiency policy</td>
</tr>
<tr>
<td><strong>Chapter 4: Renewable energy</strong></td>
</tr>
<tr>
<td>4.1 Solar photovoltaics.</td>
</tr>
<tr>
<td>4.2 Wind energy.</td>
</tr>
<tr>
<td>4.3 Solar thermoelectric</td>
</tr>
<tr>
<td>4.4 Other technologies</td>
</tr>
</tbody>
</table>

## Competences and Learning Outcomes

<table>
<thead>
<tr>
<th>Competences</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>General Competences</strong></td>
</tr>
<tr>
<td>CG2. Know how to apply and integrate knowledge, the understanding of it, its scientific basis, and problem-solving capabilities in new and loosely defined environments, including multidisciplinary contexts, both for research and highly-specialized professions</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Specific Competences</th>
</tr>
</thead>
<tbody>
<tr>
<td>CE11. Acquire a clear criterion about the different regulatory instruments to improve the environmental impact of electricity, and to know the major sources of renewable electricity.</td>
</tr>
<tr>
<td>CE12. Be able to carry out an informed assessment of the environmental impact of electricity generation technologies.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Learning outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the course the students must be able:</td>
</tr>
<tr>
<td>RA1. To integrate the knowledge of this multidisciplinary area in which technical aspects of renewable energy have to be considered when defining environmental policy and regulation.</td>
</tr>
<tr>
<td>RA2. To understand why the environmental impact of electricity has to be taken into account.</td>
</tr>
</tbody>
</table>
RA3. To be able to prioritise the major environmental impacts of electricity, and understand their physical basis.

RA4. To know the best methods for quantification of environmental impacts.

RA5. To learn the basic elements, advantages and disadvantages of the different regulatory instruments available to control environmental impact.

RA6. To become familiar with the current use of these regulatory instruments across the world.

RA7. To keep an updated knowledge on the state of development of the major sustainable technologies related to electricity production and use.
# TEACHING METHODOLOGY

## General methodological aspects

<table>
<thead>
<tr>
<th>Classroom Methodology: Activities</th>
<th>Competences</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teaching method is focused on easing the learning of knowledge and increasing the student critical thinking.</td>
<td>CB2, CE11 and CE12</td>
</tr>
<tr>
<td>1. <strong>Lectures.</strong> Description of the course contents by the course instructor and professionals from the power sector. They will include dynamic presentations, case studies, and open discussion of concepts (30 hours).</td>
<td>CB2, CE11 and CE12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Non-Classroom Methodology: Activities</th>
<th>Competences</th>
</tr>
</thead>
<tbody>
<tr>
<td>Teaching resources require the active participation of the student. In addition, the classroom activity should be complemented by the individual student work performed out of class. Both aspects are taken into account in the evaluation method.</td>
<td>CB2, CE11 and CE12</td>
</tr>
<tr>
<td>1. <strong>Personal work of the student.</strong> Study of the course content, including both lectures and required readings (60 hours).</td>
<td>CB2, CE11 and CE12</td>
</tr>
<tr>
<td>2. <strong>Term paper.</strong> Individual research by the student in which the concepts learnt will be applied to a real case (20 hours, optional).</td>
<td>CB2, CE11 and CE12</td>
</tr>
</tbody>
</table>
## ASSESSMENT AND GRADING CRITERIA

<table>
<thead>
<tr>
<th>Assessment activities</th>
<th>Grading Criteria</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Exams:</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| There will two tests, which will cover the theoretical concepts of the course. Questions will be open-format and multiple-choice. | - Concept understanding  
- Presentation and written communication | 80% |
| 1. The first test will cover the first part of the course (chapters 1-2) and will take place in week 8. Students must achieve at least a 4 to pass the course. It will account for 40% of the final grade. | | |
| 2. The second test will be given in the last day of the course, and will cover the second part of the course (chapters 3-4). Students must get at least a 4 (over 10) in this test to pass the course. It will account for 40% of the final grade. | | |
| **Performance evaluation.**  
- Participation in class.  
- Term paper of the course (optional). | - Concept understanding  
- Application of concepts to the analysis of real situations  
- Presentation and written communication | 20% |
## GRADING AND COURSE RULES

### Grading

The student has two periods of final evaluation during the academic year. The first one will be carried out at the end of course (end of the semester). In case that this was not passed (obtaining 5 or more points), the student has another opportunity of final evaluation at the end of the academic year. The dates of evaluation periods will be announced in the web page.

The final grade of the course will be obtained by addition of the following criteria for any evaluation period:

- 40% intermediate exam (with a minimum grade of 4 over 10)
- 40% final exam (with a minimum grade of 4 over 10)
- 20% participation in class and solution of cases
- Up to two additional points with the optional term paper

In case the student fails the first evaluation period, there will be a retake test, after which the final grade will be 80% the grade of the test (with a minimum grade of 4 over 10) and 20% the participation in class and solution of cases.

### Course rules

- Class attendance is mandatory according to Article 93 of the General Regulations (Reglamento General) of Comillas Pontifical University and Article 6 of the Academic Rules (Normas Académicas) of the ICAI School of Engineering. Not complying with this requirement may have the following consequences:
  - Students who fail to attend more than 15% of the lectures may be denied the right to take the final exam during the regular assessment period.
  - Regarding laboratory, absence to more than 15% of the sessions can result in losing the right to take the final exam of the regular assessment period and the retake. Missed sessions must be made up for credit.

Students who commit an irregularity in any graded activity will receive a mark of zero in the activity and disciplinary procedure will follow (cf. Article 168 of the General Regulations (Reglamento General) of Comillas Pontifical University).
## WORK PLAN AND SCHEDULE

<table>
<thead>
<tr>
<th>In and out-of-class activities</th>
<th>Date/Periodicity</th>
