Contribution of the degree to the professional profile
<p>Contracts are the most important legal instrument in the commercial world. International business lawyers need to have a good command of international contract law and gather general and specialized knowledge on those contracts which are directly related to international trade and transactions (sale of goods, payment instruments, guarantees, carriage of goods, etc.). The approach to this topic will be made from a EU perspective but with a worldwide orientation. Students will learn to identify and apply the relevant legislation, analyze relevant case law and be prepared to solve different legal problems in this field.</p>

TEACHING METHODOLOGY

General methodological aspects of the subject
Contact hours methodology: Activities
This subject is composed by 30 hours of classroom time. Sessions 1, 2, 4, 5, 7, 8, 10 and 11 will be structured as lectures mixed with experiential learning. Sessions 3, 6, 9 and 12 will be devoted to the discussion and resolution of problems. Lectures will address the topic assigned to each session and will request students to read in advance the materials which may be indicated by the professor. Problem sessions will also need to be prepared in advance by students. Participation in class specifically in the problem sessions (but also in the lectures sessions) will be credited towards the final student grade in the proportion mentioned below. Some or all of the problems will need to be handed over to the professor for grading purposes.
Independent study methodology: Activities
Students will be requested to read in advance of each session the assigned materials and prepare the problems to be discussed. Reading, research and written skills will be needed for this purpose
