## SPECIFIC DATA OF THE SUBJECT

Context of the subject

Contribution to the professional profile

The current management perspective is an integrated approach that encompasses many different issues in the Business Organization area: people management, strategy design, organizational structure and development of new working structure. Human Resources Management subject is a core subject of the student curriculum, providing the Business Administration graduate with the knowledge and skills needed to enhance the main asset in today's companies "human capital", to create value for both company and society.

Hence, this subject is not addressed solely from the functional point of view, but also from the business managers perspective, who must be familiar with these techniques and skills in order to establish key strategic guidelines to be followed. Therefore, it is essential that the company manager understands the purpose of each practice and the advantages and disadvantages of techniques used to carry them out. This is the true spirit of the subject within the Degree in Business.

## Pre-requirements

The subject is undertaken in the second cycle of the Degree and it builds on the basic knowledge of Organizational Behavior, previously studied in the first cycle. Other related subjects that complement Human Resources Management are: Leadership, Negotiation Techniques and Communication Techniques, all of them undertaken in the second cycle with a practical approach.

## TEACHING METHODOLOGY

### General aspects

The focus of this subject is highly practical, based mainly on student learning, promoting their autonomy and active participation, in order to help students acquire the skills needed to work proficiently in their professional future. For the development of content and skills described in the preceding paragraphs, will undertake the following activities:

In class Methodology: Teaching Activities

AF1. Lectures in which the teacher will present the main contents in a clear, structured and motivating way, usually supported by various audiovisual resources. They highlight what is essential in order to facilitate the individual learning process for the student and finally, doubts and suggestions from students are gathered and attended. Learning is a work of the student that no teacher can replace. In master classes, teachers are limited to develop the contents considered more important or more complicated to understand. The student should work on the issues prior to its exhibition in class. E To verify that the student meets its obligation, teachers may perform short tests prior to the presentation of the topics. They may also perform these exercises at the end of the class to test your understanding of the different contents ("One minute" paper).

CG03, CG05

AF2. Discussion sessions whereby the teacher explains the basics, with the active and collaborative participation of students. It includes dynamic presentations and formal or spontaneous participation of students through various activities (The first minutes of the class are used to explain what is going to be discussed, relating this to prior sessions. Then the objective of the session is set (what is this useful for?) and then, the theoretical concepts essential to be used and the practical applications in the real world are explained)

CG03, CG05

AF6. Analysis and resolution of cases proposed by the teacher, from a brief reading, a material prepared for the occasion, or any other data or information necessary to implement in practice the theoretical knowledge boosting the student's argumentative ability. They are based on the selection of materials suited to the course professional, to the greatest extent possible, in order to train the student in solving real problems and the ability to react to unexpected situations and approaches. Usually conducted in teams.

CG02, CG10,  
CG12

AF7. Simulations, role plays, group dynamics. Simulations, role plays and other group dynamics are learning activities in which the student acts the part of another person. Students will analyze the situations, take decisions and identify and evaluate the consequences.

CG09, CE13

<p>AF8. Public presentations. Presentations in class, individually or collectively. They will assess the conceptual organization, mastery of subject matter, the simplicity, rationality and respect of the different phases. In the case of team presentations the active contribution of team members will be assessed</p>	<p>CG03, CG12</p>
--	-------------------

### Non-presential methodology: Activities

<p>AF10. Individual study made by the student in order to understand and retain scientific content with a possible future application in their profession. Individual reading of texts (literature) and notes of different types (books, magazines, loose articles, newspapers, Internet publications, reports on practical experiences, etc...) related to the subject. In the Resources Site of the University students can find documentation, materials of the sessions and practices.</p>	<p>CG03, CG05</p>
<p>AF11. Tutorials for Individuals or small groups, to solve problems that have may arise, as well as monitoring student progress.</p>	<p>CG03</p>
<p>AF12. Monographic Research team based, where the students will have to share information and resources to achieve a common goal. Individual objectives are achieved only if everyone achieves theirs, so there is a significant interdependency to achieve goals.</p>	<p>CG12</p>
<p>AF15. Organized Reading. Reading and analysis of relevant texts with various tasks to assess reading comprehension of an individual or group.</p>	<p>CG12</p>

### SUMMARY OF STUDENT WORKING HOURS

IN CLASS HOURS		
Lectures	Practices, case resolution	Simulations, Role play, Group dynamics
31,00	22,00	22,00
NON PRESENTIAL HOURS		

Exercises and case resolution	Individual and/or group study and organized reading	Monographies and search work, individual or collective	Simulations, Role play, Group dynamics
17,00	21,00	20,00	17,00
CREDITS ECTS: 6,0 (150,00 hours)			

## ASSESSMENT AND EVALUATION CRITERIA

Evaluation activities	Criteria	Weight
Final written exam: on the fundamentals of HR studied along the sessions	Argumentative and expositive ability Comprehensive and relational ability.	50 %
Active participation in class and forums. Quality attitudes towards individual and team work. Public discussions in current issues in managing people.	Participation and rigorous Approach to the subject. Proactivity, teamwork.	10 %
Monographic Essay of research on the application of HHRR policies in a company, or on an actual and relevant topic in people management.	Synthesis ability. Ability to argument and show ideas. Public presentation and defense.	15 %

<p>Resolution of 2 case studies: practical applications of skills in each of the topics. They must be submitted and approved to the exam. (Note of internal regime to take forward the case studies carried out in class: If students make with their teams a certain practice in class, the individual mark given is the same for all of the team members. If a student has not been able to attend the session in which the practice is done, he/she will need to justify their absence with the relevant documentation. In this case, the student will never get the group's mark. Only if the justification is relevant, the student will be able to deliver the exercise, following the directions given by the Professor with academic rigor).</p> <p>Group and individual activities for on-going evaluation are included here.</p>	<p>Individual work, team work and practical application</p>	<p>25 %</p>
