SPECIFIC DATA OF THE SUBJECT

Contextualization of the subject

Contribution to the professional profile of the degree

The process of globalisation is probably the strongest force that has been changing the business environment. This environment is marked by commercial, financial and cultural barriers that are becoming ever more porous and are therefore driving the interdependent growth of national economies. Operating in this increasingly complex environment poses a challenge for companies. It is not only large multinational companies that are affected: we can in fact connect, with increasing ease, business management and the management of international companies. However, there still exists a difference between the domestic and international nature of a company.

Although this subject places an emphasis on multinational companies, due to its extraordinary prominence in investment and international trade, the subject's general objective is to provide the student with an encompassing view on the key context of the international aspect of business operations. The framework arises from the need to be multidisciplinary in economics, politics, ethics, culture and strategy, in order to make decisions efficiently from within the heart of an international company

Prerequisites

No formal requirements, however, the subject assumes a basic knowledge of economics as a science and the meaning and function of business, addressed, respectively, in the subjects of Economy (First year of E2/E4) and Fundamentals of Business Management (First year of E2/E4)

TEACHING METHODOLOGY

General methodological aspects of the subject

This subject is taught following a participation-based method that is orientated to the fundamental theories that contribute to an in-depth and diverse understanding of the reality of making business decisions and its practical application as a professional.

In-class Methodology: Activities

TA1. Lectures in which the lecturer defines and clarifies concepts and specific terminology, identifies the main debates and lines of thought on the subject in question and illustrates their explanations with examples and experiences related to the content. The lecturer interacts with students, promoting their active participation in discussing, debating and expanding on the various aspects of the most complex, polemical and multidimensional contents or contents with a significant ideological component.

TA2. Case-study analysis and resolution posed by the lecturer using the appropriate materials for each case with the objective of enabling the students (working in a group, individually or guided by the lecturer) to put into practice the knowledge they have acquired, identifying problems, evaluating and debating alternatives and arguing the selection of different proposals. Alternatively, students prepare cases based in recent news dealing with international business

TA3. Class discussions and debates of resolving cases or as an individual activity, the students must challenge different ideas and personal views on controversial aspects of the topic in question. Students need

to have done previous research work on which to base and form their arguments which will be used throughout the debate

TA4. Oral presentation of research work. Public presentation and defence in class of the reasoning, objectives and main findings of research work carried out throughout the year

Non-Presential Methodology: Activities

TA6. Independent study. Reading of basic documents and complimentary materials suggested by the teaching staff (or searches suggested for the students) with the objective of enabling the student to understand and think about the key content of the subject, acquiring the fundamental theories needed to tackle the different activities carried out during the course.

TA7. Monographic research. Development of a research project derived from a research question related to the course contents that has been found by the student, with the objective of systemizing or generating knowledge, diagnostics and action proposals for the individual case.

TA8. Tutorial sessions aimed at solving problems and problems that arise through the learning process as well as to teach certain skills

ADDITIONAL NOTES ABOUT Assessment and Grading

In order to pass the subject a minimum grade of "5" is required in both the final exam and all other assessment activities carried out throughout the course.

Those students that, for any reason, have been granted educational dispensation, must carry out a theoretical-practical examination on all aspects covered by the subject which must be passed in order to progress.

With regards to the July re-sit exam, the following students must attend:

- a. Those that have not passed the final exam, in which case, they must take a written exam during the re-sit exam period, with their final grade based on the weightings expressed above.

Those that have not reached the minimum grade of "5" in conjunction with the remaining assessments. In this case, they must take a re-sit exam arranged during the re-sit exam period and, in addition, must carry out the practical activities as established by the lecturer.
