## SPECIFIC DATA ON THE SUBJECT

### Contextualization

#### Contribution to the students' professional profile

International relations are impossible to analyse without an economic perspective. This subject is focused on the field of international economics, more specifically on relations established between countries and enterprises through trade and investment.

The subject is mainly based on understanding and interpreting the mechanisms and means that determine both variables. Throughout this course students should acquire autonomy in analysing international relations by understanding the main concepts and using rigorous data sources. The subject will focus on current issues (trade wars, Brexit, currency turbulences, investment settlement disputes, etc.)

#### Pre-requirements

Having studied the two previous subjects on the field of Economics: Economic Approach to International Relations (1<sup>st</sup> year) and International Political Economy (3<sup>rd</sup> year).

## THEMATIC BLOCKS AND CONTENTS

### Contents

#### Block 1: Introduction

**Unit 1:** What should a Bachelors' degree student know on international trade and investment?

**Unit 2:** Revision of basic economic concepts (GDP, business cycles, inflation, unemployment...)

#### Block 2: International trade and exchange rates

**Unit 1:** Advantages of international trade: the absolute and comparative advantage theories

**Unit 2:** New perspectives on international trade

**Unit 3:** Protectionism and economic policy

**Unit 4:** Economic integration

#### Block 3: Exchange rates, interest rates and global financial markets

**Unit 1:** Determinants of exchange rates

**Unit 2:** Business and exchange rate risk

**Unit 3:** Exchange rate regimes and economic policy

<b>Block 4: Balance of payments (BOP)</b>
<b>Unit 1: The balance of payments</b>
1.1 Current account balance 1.2 Financial account balance
<b>Unit 2: Exercises</b>
<b>Unit 3: Global imbalances</b>
<b>Block 5: International investments</b>
<b>Unit 1: Investments</b>
1.1 Main concepts 1.2 The Ownership-Location-Internalisation (OLI) paradigm and Foreign Direct Investment (FDI)
<b>Unit 2: Types of international investments</b>
2.1 Empirical data on FDI 2.2 Portfolio investments and financial crisis 2.3 Sovereign Wealth Funds

### TEACHING METHODOLOGY

<b>General methodologic aspects</b>	
<b>Classroom teaching: activities</b>	<b>% Attendance</b>
1. <b>Exposition of lessons.</b> Exposition of the subject's contents by the lecturer in a clear, structured and motivating way. Complemented by audiovisual tools, such as slides, charts, websites, videos and debates among the students.	<b>20</b>
2. <b>Practical activities and problem solving.</b> Students should continually read articles, watch videos or search in databases proposed by the lecturer in order to comment them in class. The main aim is the application of the theory to current affairs and real cases. They should also calculate some basic variables regarding macroeconomics, trade and investments. Could be carried out in or outside of the class.	<b>25</b>
3. <b>Individual and group assignments.</b> Reading articles and writing personal thoughts and critical assessment.	<b>30</b>

<p>Shorter assignments are individual, but the longest assignment will be carried out in groups of two or three(AF3)</p> <p><b>4. Individual study.</b> The students should study the contents of the subject exposed in class and establish interrelations between them with the aid of the reference materials suggested by the lecturer. The purpose is the development of the students' analytical and synthetic abilities.</p>	<p><b>20</b></p>
---	------------------

## EVALUATION CRITERIA

Graded activity	CRITERIA	WEIGHT
Attendance and participation in class. (SE3)	<p>Attendance sheet will be distributed during each lesson.</p> <p>Students are required to attend at least 60% of the lectures. Those who do not, will get an "absent" mark and will have to sit the exam in June.</p>	10%
Individual assignments at home (exercises and readings) and final task in pairs or groups (report on a country's economic performance). (SE4) (SE5)	<p>To be handed in on paper.</p> <p>Use of vocabulary, mathematical formulas, data sources learnt in class.</p> <p>Meeting deadlines.</p> <p>Addition of own thoughts and opinions.</p>	40%
Final exam. (SE1)	<p>Multiple choice questions and two or three longer exercises (commenting an article/chart, calculating some variables).</p> <p>Students should get at least 4 out of 10 in the final exam in order to pass the subject. If not, they will have to resit the exam in June.</p>	50%

## OTHER EVALUATION CRITERIA

The criteria stated above applies to students who regularly attend lectures and pass the final exam in December/May. For those who do not, they will have to (re)sit the exam in **June**.

- For those students who did not attend class on a regular basis the mark of the final exam will be their final mark, without taking into account the course assignments.
- For those students who did attend class on a regular basis and have handed in the assignments, but did not pass the exam in December/May, there are two options:
  - o Resit the exam in June and if their mark is high, their exam mark will be their final mark
  - o Resit the exam in June. If their exam mark is not very high, but they have performed well in class and their assignments were good, then the exam mark will weight 60% and the average of their assignments 40%.

## WORK PLAN SUMMARY

<b>Classroom and non-classroom activities</b>	<b>Frequency</b>	<b>Place</b>
Cases and exercises	Each week or fortnight	In class
Final assignment	At the end of the semester	At home
Assignments and readings	Each week or fortnight	At home
<b>Working hours by student</b>		
<b>CLASSROOM HOURS</b>		
<b>45</b>		
<b>NON-CLASSROOM HOURS</b>		
<b>40</b>
