## SPECIFIC DATA OF THE SUBJECT

Contextualization of the subject
Contribution to the professional profile of the degree
Corporate governance (hereinafter GC), is, the set of policies, processes and practices through which an organization is managed and controlled at the strategic level. How a company is governed influences the rights and relationships between different stakeholders of the company, and ultimately determines the way in which the company is run.
As mentioned in the previous paragraph, it is very important that management professionals understand CG issues from different perspectives: the control mechanisms, decision making processes, and interactions (trust, leadership, power) of the different actors involved in government, as well as the "governors", the legal and regulatory framework, the election and representation systems, among others.
In addition, the consulting industry has developed a specific corporate government consulting service, which is becoming increasingly relevant among customers, and to which students could approach in their professional careers.
The objective of this subject is to familiarize students with the concepts and foundations of corporate governance; this will help them understand that corporate governance can become a key tool in the strategic management and control of corporations. The course, too, aims to make students aware of the real problems associated with the relationship between the company's board of directors, its president, its managers, its owners and other groups of interest linked to it. Finally, the course invites to make a reflection on the ultimate

objective of companies, both from a philosophical and cultural dimension and from a power game dimension: Who, ultimately, has the power to set the direction the company takes?

### Prerequisites

Some basic fundamentals of the strategic management are an important pre-requisite to take course and fully benefit from it.

This subject is strongly connected with other different topic in Organization, such as Ethics, Corporate Social Responsibility, Human Resources Management, Leadership and Change Management.

## TEACHING METHODOLOGY

### General methodological aspects of the subject

#### In-class Methodology: Activities

##### Lectures.

Instructors will promote debate during theoretical lectures.

Students must come to lectures with all the pre-reading done.

Attendance and participation are essential requirements for the effectiveness of the lecturing sessions.

CG01, CG02, CG05,  
CG06, CG08, CG09, CE03

### **Portfolio**

Students work in group on a guided basis; they will elaborate a portfolio focused on one specific real and quoted company of their choice (one per group).

During these working sessions, students will research data on the chosen company, and will try to link these data to the CG theory previously read and explained. They will simultaneously clarify and complete the different concepts they work on.

Each group will hand in their piece of work at the end of the portfolio session, they will, in exchange, get feedback from instructors regarding their work and their learning process

## **Non-Presential Methodology: Activities**

### **Portfolio**

Students will work in group on the portfolio of a real quoted company of their choice.

The final output will be an argumentative and evaluative paper focused on giving answer to the following questions:

"What is the actual company's CG ideology?"

"Who are the actual powerful actors in the CG of the company?"

"How do they exert their power into the strategic management of the company?"

Groups will hand in different parts of their portfolio, usually after the working sessions in the classroom, but they will also hand in a complete final portfolio at the end of the semester

### **Essay.**

At the end of the semester, students will hand in a piece of argumentative writing several paragraphs long written about one CG topic or practical case proposed by the instructors.

The essay allows students say something for themselves using the contents of the course, to present ideas they have learned in their own way. The emphasis should be on working with other people's ideas, rather than reproducing their words, but the students' voice should show clearly. The ideas and people students refer to in their essay need to be made explicit by a system of referencing.

The proposed topics can either lead to a descriptive, or explicative, or comparison essay or propose an in depth analysis of a real company practical case.

The final paper **should not be longer than 5 pages** (references and appendices excluded)

### **Individual study and reading.**

Each student will need to organise their time outside the class in order to do all the pre-readings of each session, and in order to profoundly study the subject: they will have to understand, elaborate, retain and assess all concepts, theories and tools presented and worked in class.

The course instructors will recommend some complementary reading.

#### **Tutorials.**

Students will have a chance to meet with the course instructor individually and outside the class if required. These tutorial sessions will help students solve problems and uncertainties faced regarding the course contents, activities and assessment.

#### **Collaborative learning**

As students will have to work in groups, each of them will have a chance to develop interpersonal working skills while collaborating with their group mates.

## Ratings

### Resits.

In case of failure, students can re-sit each failed activity. The final grade weighting will be kept as far as the student gets a grade of 5 or more in each resat activity.

Resits are usually scheduled at the end of the academic year.

### Students with an attendance waiver

In order to pass the course, these students will have to take the 2 types of individual exams and the final grade of the course will be 100% the average grade of these exams (25% for test #1, 25% for test #2 and 50% for the essay).

They will be allowed to choose between taking the mid-term test and the final test, or to take just one final test covering all course contents.
