

## GENERAL INFORMATION

Data of the subject	
Subject name	Advanced Materials & Joining
Subject code	DIM-MII-611
Main program	<a href="#">Official Master's Degree in Industrial Engineering</a>
Involved programs	Máster Universitario en Ingeniería Industrial [Second year] Máster Universitario en Ingeniería Industrial + Máster en Industria Conectada / in Smart Industry [Second year] Máster Universitario en Ingeniería Industrial + Máster en Ingeniería para la Movilidad y Seguridad [Second year]
Quarter	Semestral
Credits	3,0 ECTS
Type	Compulsory
Department	Department of Mechanical Engineering
Coordinator	Juan Carlos del Real Romero
Course overview	This course will be an introduction to advanced materials and joining techniques. An overview of applications and manufacturing methods of new materials will be provided while special focus will be put to polymeric matrix composites. The whole life cycle from raw material to a quality-controlled assembly will be studied, including general properties of materials, testing methods and NDT evaluation. An introduction to bioinspired materials, smart materials, functional materials will be provided. In addition this course will cover the most recent advances in welding and joining technologies.

Teacher Information	
<b>Teacher</b>	
Name	Javier Munilla López
Department	Department of Mechanical Engineering
E-Mail	<a href="mailto:jmunilla@comillas.edu">jmunilla@comillas.edu</a>
<b>Teacher</b>	
Name	José Miguel Cárdenas Aguado
Department	Department of Mechanical Engineering
E-Mail	<a href="mailto:jmcardenas@icai.comillas.edu">jmcardenas@icai.comillas.edu</a>
<b>Teacher</b>	
Name	Ariana Marco Foruny
Department	Department of Mechanical Engineering
E-Mail	<a href="mailto:amarco@icai.comillas.edu">amarco@icai.comillas.edu</a>
<b>Profesores de laboratorio</b>	
<b>Teacher</b>	

<b>Name</b>	Sara López de Armentia Hernández
<b>Department</b>	Instituto de Investigación Tecnológica (IIT)
<b>Office</b>	Santa Cruz de Marcenado 26
<b>EMail</b>	sara.lopez@comillas.edu
<b>Phone</b>	2704
<b>Teacher</b>	
<b>Name</b>	Eva Paz Jiménez
<b>Department</b>	Department of Mechanical Engineering
<b>Office</b>	Alberto Aguilera 25
<b>EMail</b>	epaz@iit.comillas.edu

## DESCRIPTION OF THE SUBJECT

### Contextualization of the subject

#### Prerequisites

Knowledge of basic courses of materials science and strength of materials.

## Course contents

### Contents

#### Theory:

1. Introduction to composite materials: classifications, applications, terminology. Metallic, Ceramic and Polymeric Matrix Composites
2. Materials properties. Overview of different types of matrices, reinforcements, adhesives. Prepegs, fillers and other additives.
3. Micromechanical analysis of a lamina: prediction of mechanical properties of composites based on properties of fiber and matrix; volume and weight fractions. Longitudinal strength and stiffness. Coefficients of thermal and moisture expansion.
4. Basic characteristics of manufacturing processes for polymeric matrix composites.
5. Overview of ceramic and metallic matrix composites manufacturing methods
6. Mechanical Testing of Composites. Non destructive testing of composites. Applications.
7. Bioinspired materials, smart materials, functional materials.
8. Joining. Advanced welding methods. Friction Stir Welding, Laser welding, EB Welding, Ultrasonic.
9. Mechanical joining. Self-piercing rivets. Clinching. High speed joining.
10. Composites joining. Induction welding of thermoplastic composites. Co-curing of thermoset composites. Thermal assisted piercing of thermoplastic composites for mechanical fastening. Microwave welding of thermoplastic composites with dissimilar materials
11. Adhesive bonding.

#### Laboratory:

Each unit described previously has at least one associated lab practice (2 hours)

1. **Manufacturing a laminate composite.**
2. **Mechanical testing and fracture behavior of laminate composite**
3. **Mechanical testing of bonded joints**
4. **NDT inspection of composite**

## EVALUATION AND CRITERIA

## BIBLIOGRAPHY AND RESOURCES
