

I. TECHNICAL FACT SHEET OF THE SUBJECT

Data of the subject	
Name	Environmental Law
Degree	
Curso	
Character	Cuatrimestral
ECTS Credits	3
Departament	Private Law
Area	Civil Law
Teachers	Prof. Dra. Dña. Pilar López de la Osa Escribano
Data of the teachers	
Profesor	Prof. Dra. Dña. Pilar López de la Osa Escribano
Grupo	
e-mail	pldelaosa@icade.comillas.edu
Despacho	Hourly teacher dispatch

Contribution to the profesional profile of the degree

In Spain and in the European Union the Environmental Law is part of the daily activity of all types of companies, not only the industrial ones, but those belonging to other economic sectors, such as financial, insurance or tourism. The public authorities, as well as other relevant parties (judges, public notaries, registrars) must also know this part of the legal system. Therefore, the subject of "Environmental Law" provides the student with the knowledge of a set of rules with which most likely he/she will have to deal in his/her future professional activity, whichever it may be.

II. SKILLS TO BE WORK

Generic skills
Instrumentals skills
<p>Problem resolutions.</p> <p>Ability to apply knowledge in practice, getting results.</p>
Personals
Specific skills
Conceptual (Knowledge)
<p>Comprehension of Environmental Law.</p> <p>Place the Environmental Law in a complex legal and economic context.</p> <p>Identification in Environmental Law, its basic rules and their application to specific cases</p>
Procedural (do)
<p>Discursive and argumentative skills..</p>
Professionals (Know-how)
<p>Identifying the elements of a legal problem, proposing alternative solutions</p>

III. ISSUES AND CONTENTS

BLOCK 1: Previous concepts
Lesson 1: Basics: environment, sustainable development and Environmental Law. General principles.
Lesson 2: International Environmental Law and European Environmental Law
Lesson 3: The Environment in the Spanish Constitution
BLOCK 2: Environmental standards of cross content
Lesson 4: Access to environmental information and participation in environmental issues
Lesson 5: Environmental Assessment (plans, programs and projects). Integrated Environmental Authorization.
Lesson 6: Environmental Liability
BLOCK 3: Sectorial environmental standards
Lesson 7: Climate change. Atmosphere. Noise
Lesson 8: Waste. Contaminated soils
Lesson 9: The hydraulic and maritime-terrestrial public domain
Lesson 10: Protected natural spaces. Wild species protection.

V. TEACHING METHODOLOGY

Classroom methodology. Activities

Lectures: at least one part of the program will be taught in such classes, consisting of a clear and structured presentation by the teacher. This exhibition will have a theoretical component complemented with the approach and resolution of legal problems, which require the active participation of students. The main objective of this activity is to present and introduce students to the content in question, so that they can focus their study and develop the proposed practical work.

To allow the active participation of students, they will know previously the content of the class and materials that can be used for its preparation (namely, rules, books and case law). In addition, activities are scheduled to stimulate the development of these sessions, especially presentations by students of some of the issues, clarification of doubts, and exposure of disputes or arguments on the specific subject. Group work is encouraged.

Solving exercises, problems or case studies: the students solve in class with teacher helping a problem or event that may have previously raised. In these classes the teacher will guide the interventions.

Methodology distance. Activities

Preparation before lectures

Solving exercises, problems or case studies: work that students do outside of class to solve the exercises proposed problems or cases. To do this, the teacher can provide literature and materials.

Student autonomous work: work outside the classroom, including literature search, with which the student consolidates his knowledge to overcome the exam.

Resolution of practical cases and legal problems posed during class.

VI. SUMMARY OF STUDENT WORK HOURS

SUMMARY OF STUDENT WORK HOURS			
Activities	Contact hours	No contact hours	Total
Master class	25	23	48
Case studies	4	8	12
Continuous assessment	1	0	5
Evaluation: examination	(3)	9	9 (+3)
Assessment exam review	(1)	0	(1)
ECTS CREDITS	34 (+4)	40	74 (+4)

VII. EVALUATION AND QUALIFICATION CRITERIA

Evaluation activities	General competences	Indicators	Percentage in the evaluation
Participation in class. It may include (i) voluntary presentation of a certain topic, and (ii) partial, short follow-up tests.	Problem-solving abilities. Ability to apply knowledge in practice, obtaining results	Argumentative structure. Knowledge of matter. Approach to the issue	20%
Final written exam	Problem-solving abilities. Ability to apply knowledge in practice, obtaining results	Structure. Clarity of explanation Grammar correction. Spelling and presentation.	80%

Rating

Final written exam (80%), whose contents can be:

- Development of parts of the program; and/or
- Resolution of actual case and legal problems.

Passing the exam is a prerequisite to pass the course.

Continuous assessment (20%). Class participation. It may include (i) voluntary presentation of a certain topic, and (ii) partial, short follow-up tests.

Exchange students (out-going students): Written examination (100%)

In the extraordinary and subsequent calls there will only be a written final exam, with the same characteristics as that of the ordinary call (100% of the grade).
