## TECHNICAL SHEET OF THE SUBJECT

Data of the subject	
Subject name	Estadística y Probabilidad/Statistics and Probability
Subject code	E000013558
Main program	<a href="#">Grado en Análisis de Negocios / Business Analytics por la Universidad Pontificia Comillas</a>
Involved programs	Grado en Análisis de Negocios/Bachelor in Business Analytics y Grado en Relaciones Internacionales [Second year] Grado en Análisis de Negocios/Bachelor in Business Analytics y Grado en Derecho [Second year] Grado en Análisis de Negocios/Bachelor in Business Analytics [Second year] Grado en Admin. y Dirección de Emp. y Grado en Análisis de Negocios/Bachelor in Business Analytics [Second year]
Level	Reglada Grado Europeo
Quarter	Semestral
Credits	6,0 ECTS
Type	Obligatoria (Grado)
Department	Departamento de Métodos Cuantitativos
Coordinator	Jose Luis Arroyo Barrigüete
Schedule	Se comunicará en los primeros días de clase
Office hours	Solicitud previa
Course overview	The first part of the course is dedicated to reviewing the concepts and techniques that allow describing and summarizing a set of data from a univariate and bivariate point of view. Some of the topics covered are frequency tables, graphs, measures of central tendency, dispersion, position, concentration, contingency tables and measures of association and correlation, among others. The second part deals with the basic concepts of probability and the modeling of random phenomena. It deals with the different conceptions of probability, the Bayes' theorem, discrete and continuous random variables, and some frequently used probability models, such as the Binomial, Poisson or Gaussian, among others.

## SPECIFIC DATA OF THE SUBJECT

### Contextualization of the subject

#### Contribution to the professional profile of the degree

Subject of an instrumental nature dedicated mainly to statistical techniques that allow to describe and summarize a data set from a singlevariant and bivariant point of view. It develops topics necessary to address the information available, in such a way as to achieve a better understanding and knowledge of the behavior of the random and deterministic phenomena present in the making of business decisions in the different areas of the company (economy, finance, marketing, Human Resources), in which knowledge of reality and decisions on issues covered in them are characterized by the existence of uncertainty.

#### Prerequisites

The use of previously studied mathematical concepts is required.

### Competencies - Objectives

#### Competences

#### Learning outcomes

CN7

Resultados del proceso de formación y de aprendizaje. CN7. Conoce los fundamentos y las herramientas necesarias para el análisis de datos, desde el preprocesamiento y análisis estadístico hasta las técnicas más avanzadas, incluyendo

	modelos de aprendizaje supervisado y no supervisado.
<b>HA7</b>	Resultados del proceso de formación y de aprendizaje. HA7. Utiliza adecuadamente herramientas de análisis y visualización de datos, incluyendo software específico y lenguajes de programación
<b>CM8</b>	Resultados del proceso de formación y de aprendizaje. CM8. Identifica y selecciona la técnica o técnicas de análisis de datos más adecuada a cada problema, la implementa, interpreta adecuadamente los resultados y sus limitaciones, y los comunica a un público no técnico.
<b>RA1</b>	Estadística y Probabilidad / Statistics & Probability. RA1. Conocer los fundamentos de las principales medidas y técnicas para describir un conjunto de datos desde un punto de vista univariante y multivariante.
<b>RA2</b>	Estadística y Probabilidad / Statistics & Probability. RA2. Saber seleccionar para cada problema tanto la fuente de datos como la técnica o técnicas de análisis estadístico básico, para poder convertir los datos en bruto en información y ésta en conocimiento que ayude a la toma de decisiones y a mejorar la gestión.
<b>RA3</b>	Estadística y Probabilidad / Statistics & Probability. RA3. Ser capaz de resumir, sintetizar, interpretar y comunicar de una forma atractiva y eficaz los resultados del análisis de datos, de manera que resulten comprensibles a destinatarios técnicos y no técnicos, y ayuden de forma eficiente a la toma de decisiones empresariales.

## THEMATIC BLOCKS AND CONTENTS

### Contents - Thematic Blocks

#### INTRODUCTION

TOPIC 1: BIG DATA

#### DESCRIPTIVE ANALYSIS

##### TOPIC 2: INTRODUCTION TO CLASSIC STATISTICS

-Key Definitions

##### TOPIC 3: DESCRIPTIVE ANALYSIS

- Observation units: Variables and Data
- Presentation of the data: Frequency distributions and Graphical Representations.
- Relations between two variables: Scatter Charts and Contingency Tables

##### TOPIC 4: MEASURES: STATISTICS

- Measures of Central Tendency: Mode, Medium and Mean
- Position Measures: Quartiles, Deciles and Percentiles
- Variability Measures: Range, Variance, Typical Deviation, Variation Coefficient
- Standardization
- Measures of Form and Concentration: Gini and Lorenz Curve Index
- Relationship between two variables: Dependency / Independence Analysis, Correlation

#### PROBABILITY

##### TOPIC 5: UNCERTAINTY AND ITS MEASUREMENT

# COMILLAS

UNIVERSIDAD PONTIFICIA

ICAI

ICADE

CIHS

**Syllabus**  
**2024 - 2025**

- Random Phenomena: Concepts
- Operations with Events
- Probability: different conceptions
- Probability Rules
- Rectification of Probability: Bayes Theorem

#### **TOPIC 6: RANDOM VARIABLE**

- Random Variable Concept
- Discrete Random Variables: Quantum Function and Distribution Function
- Continuous Random Variables: Density Function and Distribution Function
- Expected Value, Variance and Standard Deviation: Properties
- Probability Distribution Models:
  - Discrete: Binomial, Poisson.
  - Continuous: Uniform, Normal.

## **TEACHING METHODOLOGY**

### **General methodological aspects of the subject**

The use of ChatGPT or other Generative Artificial Intelligence in any evaluation activity not explicitly authorized by the teacher will be considered a serious offense under the General Regulations of the University, art. 168.2.e: "carrying out actions aimed at falsifying or defrauding the academic performance evaluation systems". The consequences of this will be "temporary expulsion for up to three months or prohibition from taking the exam in the next call after the sanction is imposed, in one or several subjects in which the student is enrolled, [...] apart from implying a failing grade (0) in the respective subject,".

In other words, the use of ChatGPT or other Generative Artificial Intelligence is prohibited for any evaluation activity in which the teacher has not explicitly indicated that it can be used.

### **In-class Methodology: Activities**

Lessons of an expository nature.

Exercises and problem solving

Sessions dedicated to the management of the R Studio computer programs and their subsequent use for the resolution of business problems.

### **Non-Presential Methodology: Activities**

Individual and / or group study, and organized reading.

Troubleshooting both using computer programs and not.

## SUMMARY STUDENT WORKING HOURS

CLASSROOM HOURS		
Lecciones de carácter expositivo	Ejercicios y resolución de casos y de problemas	Pruebas de evaluación
35.00	21.00	4.00
NON-PRESENTIAL HOURS		
Ejercicios y resolución de casos y de problemas	Estudio y lectura organizada	
30.00	60.00	
ECTS CREDITS: 6,0 (150,00 hours)		

## EVALUATION AND CRITERIA

Evaluation activities	Evaluation criteria	Weight
FINAL EXAM	<p>It will include both theory/problems and R programming.</p> <p>To carry out the weighted average between the final grade and the tests, it is necessary to have achieved at least score 4,5 on the Final Exam.</p>	55 %
PARTIAL EXAMS	<p>WRITTEN TESTS: 45%</p> <p>Test 1 (20%): The first test at the end of topic 4. It includes topics 1 to 4, both included, and practices 1 to 4.</p> <p>NOTE: It will be a prerequisite to take test 1 to have attended the corresponding practical sessions. Failure to do so will result in a grade of zero.</p> <p>Test 2: (25%) Includes topics 5 and 6, and practices 5 and 6.</p> <p>NOTE: It will be a prerequisite to take test 2 to have attended the corresponding practical sessions. Failure to do so will result in a grade of zero.</p> <p>The absence for justified cause to any of the partial tests will cause the weight of such test to pass to the final exam. No partial tests will be repeated.</p> <p>In the final qualification, assistance and active participation will also be taken into account in the continuous evaluation.</p>	45 %

## Ratings

EXTRAORDINARY CALL

It will be considered the best of the following two options:

1. Use the same criteria as in the ordinary call.
2. Only consider 100% of the extraordinary exam grade.

### REPEATER AND EXCHANGE STUDENTS

Student who repeats the course and has the pending subject: the final grade will be obtained following the above criteria.

Student who passes the course and has the pending subject: the final grade will correspond to that of the written exam.

In third and subsequent calls the final grade will correspond to the final exam.

Exchange students (IN): same system as for regular students.

Exchange students (OUT): same system as for third and subsequent calls.

### Final Exam

Weight: 55%

A final exam of the subject will be carried out, the content of which corresponds to the entire program (including R programming)

### Partial Exams

Test 1: Weight: 20%. Topics 1 to 4, including practice with R

Test 2: Weight: 25%. Topics 5 and 6, including practice with R

## WORK PLAN AND SCHEDULE

Activities	Date of realization	Delivery date
1st Partial test: topics 1 to 4	8th week of the course aprox.	
2nd Partial test: topics 5 y 6	12th week of the course aprox.
