| <b>Teléfono</b>              | 2298                                |

## DATOS ESPECÍFICOS DE LA ASIGNATURA

| <b>Contextualización de la asignatura</b>   |
|---|
| <b>Aportación al perfil profesional de la titulación</b>  |
| <p>On one hand, the course allows the student to gather the key concepts on financial markets, its products, pricing, risks and the market participants. This gives a practical support to be able to understand the financial information as well as to be able to work on financial markets. The students learn how to make investment decision applying theory to the real world according to their needs and the characteristics of the products and markets. In summary, the course provides the analytical skills to understand concepts related to the money market, the bond market, the foreign market, the stock market and the derivative markets.</p> <p>On the other hand, the course takes into account the impact of a digital environment on the functioning of the markets, on the valuation of the assets, on the different forms of negotiation and on the regulation. The complexity of international financial markets is possibly one of the areas where Big Data has had the most impact in the field of finance. It is necessary to identify the relevant data, accumulate them, transform them, study them and analyze them to interpret them within the intended financial objective.</p> |

## Prerequisitos

No formal requirements, however accounting and financial math knowledge would be useful.

## Competencias - Objetivos

### Competencias

- 8.1 Introduction
- 8.2 Collective investment schemes
- 8.3 Capital risk entities
- 8.4 Securitization funds

## METODOLOGÍA DOCENTE

### Aspectos metodológicos generales de la asignatura

This course requires the students attend the class sessions. There are regular teaching sessions, case study discussions and practical problems and questions. Active student participation is important. They are expected to read the assigned materials prior to the class, in addition to preparing the problems and case studies when appropriate.

### Metodología Presencial: Actividades

Regular teaching sessions where the teacher will define and explain the technical terms and analysis, giving examples and pointing at the issues that arise debate in the reality of the financial markets. The student should listen attentively, trying to understand the rational and ideas being explained. He is expected to take notes of the main contents to complement class material. Classroom discussion is encouraged, and students can interrupt the professor asking questions or requesting further clarification. Preparation prior to the class is essential to take the most of the teaching session.

In addition to this, there are classes with a more active involvement from students. They will carry out activities and problems, supervised by the teacher, trying to apply in practice the theoretical content explained in class. During these workshops, problems are solved, case studies are discussed and news or reading material related to the topic are debated. Sometimes the work will be done individually, and sometimes the students will work as a team.

A few sessions may be spent in talks or presentations from guests who are professionals from different areas related to Financial Markets.

### Metodología No presencial: Actividades

Besides taking part in class work and supervised workshops, the student needs to spend time revising individually the course material. Outside of the classroom, the student must read the materials assigned by the teachers, he also must work and solve problems and questions and look for additional information when needed.

## RESUMEN HORAS DE TRABAJO DEL ALUMNO
