# **GENERAL INFORMATION**

| Data of the subject |  |  |
|---------------------|--|--|
| Subject name        | Operation of Electric Power Systems                          |  |
| Subject code        | DIE-MII-512  |  |
| Mainprogram         | Official Master's Degree in Industrial Engineering           |  |
| Involved programs   | Máster Universitario en Ingeniería Industrial [Primer Curso] |  |
| Credits             | 6,0 ECTS   |  |
| Туре                | Obligatoria  |  |
| Department          | Department of Electrical Engineering                         |  |
| Coordinator         | Michel Rivier Abbad  |  |
| Office hours        | To be checked with each teacher                              |  |

| Teacher Information |  |  |  |  |
|---------------------|--|--|--|--|
| Teacher             |  |  |  |  |
| Name                | Andrés Diego Díaz Casado                               |  |  |  |
| Department          | Department of Electrical Engineering                   |  |  |  |
| EMail               | andres.diaz@icai.comillas.edu                          |  |  |  |
| Teacher             |  |  |  |  |
| Name                | Antonio Canoyra Trabado                                |  |  |  |
| Department          | Department of Electrical Engineering                   |  |  |  |
| EMail               | acanoyra@icai.comillas.edu                             |  |  |  |
| Teacher             |  |  |  |  |
| Name                | Efraim Centeno Hernáez                                 |  |  |  |
| Department          | Department of Electrical Engineering                   |  |  |  |
| Office              | Santa Cruz de Marcenado 26 [D-601]                     |  |  |  |

### **DESCRIPTION OF THE SUBJECT**

# **Contextualization of the subject**

#### **Course contents**

#### **Contents**

# Chapter 1: Overview of the technical and economic operation of electric power systems.

- **1.1** Technical and functional description of a power system.
- 1.2 Introduction to the operation of power plants in a centralized and decentralized context.
- **1.3** Costs of the electric power system.
- 1.4 Generation mix. Fixed costs and variable costs. Consumption input-output curves.
- 1.5 Reliability and not supplied energy.
- 1.6 Basic generation expansion problem formulation in a centralized scheme

### **Chapter 2: Economic Dispatch of generation units**

- 2.1 Single-node Economic Dispatch
- 2.2 System marginal cost.
- 2.3 Network-constrained Economic Dispatch. Loss factors and network capacity constraints.
- 2.4 Consideration of additional technical and environmental constraints.

# **Chapter 3: Unit-Commitment and hydrothermal coordination**

- **3.1** Weekly scheduling.
- **3.2** Scheduling of energy-limited units.
- 3.3 Hydrothermal coordination in the short and in the long term.
- 3.4 Water value.

# **Chapter 4: The electricity market.**

**4.1** Economic theory of perfectly competitive markets.

- 4.2 Economic theory of oligopolistic markets.
- 4.3 Description of the Spanish electricity market: daily and intraday markets, ancillary services, and market of technical constraints.
- **4.4**: The electricity tariff.

## **EVALUATION AND CRITERIA**

| Evaluation activities  | Evaluation criteria  | Weight |
|--|--|--------|
| Final Exam   | <ul> <li>To have acquired the minimum knowledge required to pass the course.</li> <li>Application of theoretical concepts to solve practical problems.</li> <li>Critical analysis and interpretation of numerical exercises' results.</li> <li>Clarity of expression, layout and logical organization of written communication.</li> </ul> | 70     |
| Quizzes and tests during class hours around weeks 8 and 12. Participation during problem-solving sessions, and guided discussions. Assignments and out-off-class activities. | <ul> <li>Demonstrate the concepts' understanding.</li> <li>Application of the theoretical concepts to practical problem-solving.</li> <li>Analysis and interpretation of the results obtained in problem-solving.</li> </ul>   | 30     |

## **Grading**

The grading will be set according to the following rules:

## **Regular examination period**

- 70%: Final exam grade.
- 30%: Performance evaluation. Quizzes and tests during class hours around weeks 8 and 12 (20%), assessment of exercises and assignments (in-class and out-class), and participation (10%)

In order to pass the subject in the regular examination period, a minimum grade of 5 over 10 points will be required in the final exam.

#### **Retakes**

- 20%: Performance evaluation during the course. Quizzes and tests during class hours (15%), assessment of exercises and assignments (in-class and out-class), and participation (5%)
- 80%: Retake Final exam grade.

In order to pass the subject, a minimum grade of 5 over 10 points will be required in the retake final exam.

Class attendance is mandatory according to Article 93 of the General Regulations (Reglamento General) of Comillas Pontifical University and Article 6 of the Academic Rules (Normas Academicas) of the ICAI School of Engineering. Therefore, students who fail to attend more than 15% of the lectures may be denied the right to take the final exam during the regular assessment period.

Students who commit an irregularity in any graded activity will receive a mark of zero in the activity and disciplinary procedure will follow (cf. Article 168 of the General Regulations (Reglamento General) of Comillas Pontifical University).

### **WORK PLAN AND SCHEDULE**

| Activities  | Date of realization                               | Delivery date   |
|---|---|-----------------|
| Performance evaluation (quizzes and tests)                    | Weeks 8 and 12 (to be confirmed along the course) |                 |
| Final exam  | Regular examination period                        |                 |
| Information search assignment                                 | Weeks 2,3 and 4                                   |                 |
| Market simulation, strategy games and exercises               | Weeks 2, 3, and 11-14                             |                 |
| Review and self-study of the concepts covered in the lectures | After each lesson                                 |                 |
| Problem-solving   | Weekly  |                 |
| Hand-in solved problems for correction                        |   | To be indicated |
| Quizzes and tests preparation                                 | Weeks 8 and 12                                    |                 |
| Final exam preparation  | December  |                 |
