SPECIFIC DATA ON THE SUBJECT

INTRODUCTION

The growth of international trade has generated a complex body of **primary law**, including **treaties and international agreements, national legislation, and trade dispute settlement case law**. This body of law and agreements has been expanding into a system of multilateral trade that nowadays has reached a deadlock.

This course will analyse this system of international law, its main agreements and will delve into the reasons why it has reached a stalemate. It will depart by providing a brief introduction to the history of international trade law, and the first international organizations that regulated trade. It will then move on to the present international organization that regulates trade, the World Trade Organization, where main agreements, bodies and functions will be studied. It will then approach the substantive law that regulate trade and analyse the main principles and tariff barriers and non-tariff barriers to trade in goods, market access rules to trade in services. The Dispute Settlement Mechanism of WTO makes it a unique trade organization and it will be discussed in detail throughout the course. The course will end with the permitted exceptions to international trade and the talk about regional and bilateral trade agreements and later will discuss the impact of WTO in developing economies and trade liberalization.

What skills the students will gain from this class

The course provides students a general knowledge on international trade, but it aims at also to engage in discussions regarding international trade law and its intersections with other concerns, such as trade liberalization and development. Many controversies surrounding these intersections will be discussed, such as right to water, right to food, right to health, environmental protection, democratic deficit and the impact of trade liberalization on economic growth, poverty, inequality and development.

The student will also gain the following specific competence of the subject:

- I. In the conceptual aspect (knowing)
 - a. To review the international treaties that regulate global trade: the WTO
 - b. To know the legal powers of the WTO and its part in the formation of a global normative and regulatory framework in the field of trade.

 - d. To understand their interaction with the WTO legal framework.
 - e. To examine the legal challenges regarding the role of International Trade Law in global issues such as human rights, gender equality, sustainable development and environmental protection.
 - f. To understand the characteristics, role and significance of the participation of the

European Union in the WTO and examine the legal challenges regarding EU's participation in the WTO.

- g. To understand the modification in political priorities at the national and international level as a determining factor in international economic law and the policies of relevant institutions.

II. In the procedural aspect (doing):

- a. To exemplify the functioning of the WTO through the study of practical cases.
- b. Solve practical cases of policy and law making.
- c. Debate in class through small working groups.
- d. To illustrate the functioning of bilateral, regional and multilateral trade treaties through the analysis of practical cases.
- e. To demonstrate the impact of trade law on broader global concerns through case studies.
- f. To exemplify the interactions between the EU and the WTO through practical cases.

III. In the professional aspect (knowing how):

- a. To critically analyse the legal challenges involved in the subject.
- b. To argue in favour of a certain position based on the abilities acquired through discussion in class and exercises dealing with case studies.
- c. To analyse through case studies the actual functioning of the institutions of more relevance for trade operators at the WTO and the EU levels, and their relationship to the wider global economic and social context in which they operate.
