SPECIFIC DATA OF THE SUBJECT

Contextualization of the subject

Contribution to the professional profile of the degree

A characteristic of the Grade in Business Administration is its general nature. And a clear reflection of this is the extraordinary breadth of professional activities that this profile can access. From this perspective, professional practice demands from the students the challenge of knowing how to contribute with their effort and with their knowledge in contexts where they will inevitably be faced with dilemmas and ethical implications in their professional decisions, which will not only affect them personally, but also have consequences beyond their own lives.

To deal with these situations, a mere ethical sensitivity is not enough, since that is sometimes just translated into valuations resulting from mere uncritical subjective intuitions. On the contrary, today's professionals must be able to perceive the ethical implications of the situations they encounter and the consequences that can be derived from their decisions, to be able to assume them responsibly. And of course this has to be done from the perspective of a rational and wellfounded justification of their ethical criteria and assessment.

For all these reasons, together with the specific training of their respective specialties, it is essential that the future professional is trained to know how to deal with the ethical implications of its activity in a solvent and responsible manner.

Prerequisites

Students should be familiar with tools, techniques and goals of the different business areas, in order to apply the ethics discourse to them. Contents of the courses already passed are assumed.

TEACHING METHODOLOGY

General methodological aspects of the subject

Methodology (in class): Activities

Master Classes: The teacher using the methodology of the lecture, will offer a theoretical and conceptual framework of the discipline and of each theme, emphasizing the aspects and fundamental elements for its understanding.

Analysis of Situations and Cases: Some of the sessions will analyse situations or issues that allow applying aspects indicated in the theory and that favour the development of argumentative capacity, analysis, synthesis and development of the moral reasoning.

Analysis of Situations and Cases in groups: Analogous to the previous one, but carried out in small groups to facilitate a more intense dialogue among the students.

Case Presentations prepared by the students individually or in groups, within or outside the classroom.

Methodology (out of class): Activities

Individual Study: Students must read and / or study the proposed materials.

Activities: Students must perform individual or group tasks, to be assigned at the beginning of the subject, attending to the deadlines that are established.

Mentoring: A mentoring system is offered and recommended, so that students can obtain indications and approaches from the teacher that can help them in the follow-up of the subject.
